THE FREE ALCOHOL DIFFICULTY.

The fear that the users of alcohol have been entertaining, since the solvent was made free by act of Congress, that suitable regulations would not be formulated by the Treasury Department, and the consequent general demoralization to the trade which resulted, has given way to a feeling of confidence that even should no regulations be promulgated, those who are users under the plain intent of the law can recover from the Government, by process of law if necessary, all tax paid on alcohol they have purchased and used legitimately for the purposes intended by the act since the day it became operative. Eminent legal authority has been sought, and there does not appear to be the shadow of doubt but that all legitimate users under the law have clear cases, notwithstanding the fact that the law was loosely drawn. It is on the statute books, and that of itself is sufficient to establish their cases, provided they are in a position to make the necessary affidavits. It is also mandatory on the Secretary of the Treasury to formulate some regulations. If they are promptly issued, by the time Congress convenes in December the law will have been sufficiently tested, and its defects become so apparent that our legislators will have no difficulty in proceeding to an intelligent amendment, if found necessary, that the Government may be amply protected against fraud. It is conceded that nothing can be recovered on alcohol purchased even the day before the law went into effect, as no law of Congress is retroactive, and the act plainly states, any manufacturer "desiring," etc.—that is, after the law became operative. A considerable amount of the solvent is represented in the preparations in the stock of many manufacturers of medicines, and a large loss to them will be the result if they find it necessary to reduce their prices at once to meet the new conditions. This is certainly a hardship, but it is a well-known fact that interests are so diversified that legislation of any character is bound to affect adversely, for a time at least, many that it is intended to benefit.

IMPORTS OF STEARINE AND TALLOW.

There have of late been considerable receipts of what the shippers designated as "beef stearine" from Liverpool, and smaller lots from other English ports, some lots also coming from Continental ports. While this is not unprecedented, the imports of oleo stearine of late have been exceptionally large, and have, therefore, attracted attention and caused comment. There have also lately been increased imports of tallow, and these will probably hence forth be larger by reason of the removal of the duty. It would seem that with our enormous consumption of beef, the production of these products would be in excess of requirements, especially as one of the former principal uses made of tallow—the making of candles—now cuts an insignificant figure; in fact, has almost entirely been superseded. In January last we took occasion to call attention to an abnormal movement of tallow from the East to the West, and the larger imports of recent date but emphasizes and illustrates the changed conditions.

The recent large imports of oleo stearine are due, in part, to causes which do not apply to tallow, the latter being admitted free under the new tariff law, while oleo stearine remains dutiable at the same rate as before the new law was enacted. The price of this article has been ruling high, and was advancing under an indifferent supply, and the foreign markets being well stocked and ruling low, there was an opportunity to import the article at a fair profit. The imports have not materially affected the price here, and are expected to continue large, as the home demand is in excess of production. It is believed, however, that the foreign markets will be affected by the reduction of stocks, and that prices there will advance to figures which will not admit of importation at a profit, and consequently imports will then cease. Hereafter the American and European markets may be expected to vary less than they have in the past, as any surplus causing a material depression in prices will be exported and the equilibrium in prices restored.

ATTACK ON WHISKEY TRUST VOUCHERS.

Perhaps the most important move against the rebate voucher system of the Whiskey Trust was inaugurated in this city last week by gentlemen who hold and represent many thousands of dollars' worth of the Trust's vouchers. In our news columns will be found full details of the business transacted at the meeting, which was held in the office of an attorney, who has been instrumental in crystallizing and directing opposition to the detestable system under which the Trust is enabled to secure to its own uses sufficient money to practically permit it to carry on its vast business, money that in reality belongs to its customers. In a recent interview the President of the Trust courted a thorough investigation of the concern, and now his desire is to be gratified, in a manner, perhaps, that he least expected. As will be seen by the resolutions adopted, the committee appointed has wisely taken for its basis of action the plain statements of the President of the Trust, as published in his annual report to the directors of the concern on April 1st, and it proposes to ascertain just what the guarantee of the Trust really amounts to on the $1,860,525.24 rebates due the trade, in the deposit with a trust company of $2,500,000 of bonds, worth fifty cents on the dollar, and perhaps much less, considering the present low price of the stock. They also propose to take such action as will compel the payment by the Trust of the rebate vouchers now due, and which the Trust refuses to pay; in fact, there is really more behind this movement than appears on the surface. The chairman of the committee is one of the largest distributors of spirits and whiskey in the Eastern territory, and we learn from a source that we consider absolutely reliable, that large distilling interests are supporting the movement, which really has for its object the ultimate complete breaking up of the odious rebate voucher system. There is, also, a movement on foot to incorporate a large distributing company, the incorporation papers for which are already drafted, ready to be filed at such time as the projectors think most opportune.

It really appears to us that the doom of the rebate voucher system, if not of the Whiskey Trust itself, has come, for, should this movement receive the support of all the certificate holders, as it is confidently expected it will, the Trust will find it a very difficult matter to pay off at once the full amount of the outstanding certificates. Instead of there being a new rebate voucher, promised by Mr. Greenhut, as soon as the tariff should be disposed of, one that would be more "mutually beneficial" than that now in use, there will, in all probability, be none at all. The methods of the Trust and its shining lights have been so thoroughly ventilated through the public prints, especially during the past two months, that the wonder is the movement against it did not come to a head before this. Should suits be brought, the Trust will probably not allow them to come to trial, as it well knows it can offer no legal defense to the legality of the rebate vouchers.

There are many holders of the rebate vouchers scattered throughout the United States, most of them having vouchers to an amount not exceeding $100. Individually, therefore, they are almost powerless to protect their interests; united, however, they can, with no trouble to themselves and merely trifling expense, secure the enforcement of their rights, and we trust that they will promptly avail themselves of this opportunity and place themselves in communication with the secretary of the committee. Now is the time to take action, by assisting those who are directing this most formidable opposition to the detested rebate voucher system. If all will unite in the crusade, the system can easily be overthrown, and an open market established for alcohol and spirits, which, it is needless to say, will innure to the benefit of all concerned. Those who hold back and fail to take advantage of the present opportunity may have cause to regret it. The handwriting is plainly on the wall, and even though you hold vouchers and are completely tied up with the Trust, you will not lose them if you refuse to recognize that which operates in restraint of trade and purchase in the open market. It is well known in the trade that the distributors of the Trust sell at net prices, without vouchers, when they cannot induce the acceptance of the usual rebate certificate, thus practically violating the agreement implied between the Trust and those who hold its vouchers.

AUGUST PETROLEUM STATISTICS.

The reports of the several pipe lines for the month of August make a very bullish exhibit, the runs showing a decrease, while the deliveries were largely in excess of those during the month preceding, consequently the reduction in stocks has been the largest of any month this year. The present strength of the statistical situation may be clearly set forth by comparison. Thus the stocks are now lower than at any previous period, being 200,000 barrels less than they were at the close of 1890, the decrease at that time being the result of the memorable "shut-down" organized by the producers in Pennsylvania. The price of crude certificates at that time ruled considerably lower than they do at present, but the conditions were entirely different. The present low stocks were brought about by natural causes—increased consumption and decreased production—while the low stocks at the close of 1890 were due to artificial means—the shutting down of the wells by the producers, with the avowed purpose of influencing the market price of the product. While the stocks were at that time brought to a very low ebb, it was well known that plenty of oil could be produced, and would be as soon as the period of restricted development operations expired, consequently the operators on the several exchanges were not influenced by the statistical exhibit to the extent that the producers hoped they would be. At present the trade is confronted with conditions in no way analogous to those existing in 1890, except in the one feature of greatly reduced stocks. Drilling operations have, during the past year, been prosecuted with vigor, stimulated by fair prices and increased consumptive requirements, and yet the production has decreased, the average monthly runs during the past eight months having been fully 100,000 barrels below the average of the twelve months of last year. The consumption, on the other hand, has increased, the deliveries during August having been the largest of any month since October of last year, and exceeding those of last month by over 350,000 barrels. The higher prices now ruling are, therefore, fully warranted, and the hopes of the producers of still more remunerative returns have good foundation. The Ohio production, however, is a factor to be considered in this connection, although the stocks of the grade of oil produced there and designated as Lima crude are smaller than they were at the close of 1890. The consumption of this oil has increased, and, should the price of the Pennsylvania product advance materially, would be greatly augmented. The Indiana fields have also come into prominence since 1890, and their future development may have an important bearing on the general situation.

The production of the Pennsylvania, New York and parts of West Virginia and Ohio fields during August, as represented by pipe-line runs, amounted to 2,554,649 barrels, which is a decrease of 23,720 barrels, as compared with the production during

the month of July, and is considerably below the average monthly production of the first seven months of the present year. The average daily production during August was 82,408 barrels, while that during the preceding seven months was 83,142 barrels, and during the entire year 1893 it was 84,755 barrels. The total deliveries during August amounted to 3,256,302 barrels, which shows an increase over those during the month preceding of 350,519 barrels. The deliveries during August were the largest of any month since October of last year, and exceeded the average of the preceding seven months by 367,634 barrels, and the average of the twelve months of 1893 by over 230,000 barrels. The total net stocks held by the several pipe lines at the close of the month was 9,096,267 barrels, which shows a decrease during the month of 631,264 barrels. This makes the decrease since the beginning of the year 3,014,916 barrels, and brings the stocks to a lower ebb than they reached in 1890, as the result of the producers' shutdown movement, when the minimum was 9,295,514 barrels.

The report of the Buckeye Pipe Line Company for the month of August shows the production of Ohio oil to have been 1,469,372 barrels, which is an increase of 103,062 barrels over the runs during July, and is the largest monthly production yet recorded. The average monthly production of the first seven months of the present year was 1,319,484 barrels, and that of the twelve months last year 1,204,266 barrels. The deliveries during August reached a total of 1,238,183 barrels, which shows an increase of 214,867 barrels, and exceeds the average monthly deliveries during last year, and the average of the first seven months of the present year by 60,392 barrels. The total net stocks in possession of the pipe line at the close of the month was 19,736,628 barrels, which makes the increase during the month 231,977 barrels, and the increase since the beginning of the present year 1,239,288 barrels.

THE OUTLOOK FOR WINDOW GLASS.

As foreshadowed in our last editorial on window-glass prospects, there has been a prompt signing of the wage scale by all of the factories, and in the course of five or six weeks glass of this fire will be on the market. In the mean time, while there has been no change in the discounts, it will be interesting to know whether there is to be any reduction in prices on account of the altered conditions. As we stated in our editorial in the issue of September 3d, the importers, at present prices, have practically discounted the rates in the Wilson bill. As the rates proposed by the Senate finally prevailed, the importers are placed in a very trying position, and many profess to be unable to stand any further reduction in prices. They may be called upon to do so, however, as the American manufacturers are already quoting lower prices for new goods, to be delivered when made. There is no doubt but that the Americans intend to do their utmost to obtain control of the home market, but whether they will be successful in making any inroads on the seaboard territory, where most of the French is sold, remains to be seen. The prospects for a prosperous year for the entire industry are said to be excellent, as there are plenty of orders on hand, and stocks are not large. Meantime, in anticipation of lower prices, consumers are purchasing only for their immediate requirements. The market will undoubtedly present some interesting features as soon as the new glass is offered for sale.

It is a conceded fact that the Blowers' Union in this country has in great measure protected the importers as against the American manufacturers, as it dictates not only the wages to be paid, but makes such stringent rules and regulations governing every branch of the manufacture that the Americans are really prevented from availing themselves of the numerous little economies that it is so necessaryto take advantage of at the present day in every business. Were it not for the union, wages would no doubt be lower than they are, and American glass might entirely supplant French.

TRADE ITEMS.

Mr. T. A. Dillon, of Dillon, S. C., was a visitor at the Produce Exchange last week.

The Independent Distributing Co. has secured judgment against James Burnett for $169.

Mr. A. Magnus, of Maas & Waldstein, sailed on Thursday last on the steamer Columbia on a business trip to Europe.

H. R. Duval, Lewis Bros. and others have purchased lands near River Junction, Fla., containing cement rock and will develop same.

The Arminius Chemical Co. has recently purchased the Arminius pyrites mine, at Mineral City, Va., and developments will be pushed.

The report that the United States Leather Company is considering the purchase of 40,000 acres of timber land for bark in West Virginia is confirmed.

In the suit of S. M. Rice against the Whiskey Trust, to enforce the payment of rebate vouchers, the Trust has returned a categorical denial to the complaint.

Wesley R. Davis, C. A. Gitchell, Conrad Geisser and Theo. Van R. Ashcroft have incorporated the Columbia Match Co., at St. Louis, Mo., with a capital stock of $100,000.

Two cottonseed warehouses are being built at Bertram, Texas, one for the Merchants and Planters' Oil Mills, of Houston, and the other for the Austin Oil Manufacturing Co., of Austin.

Rufus L. Heflin, W. J. Betts and Lee T. Cowan have incorporated the Empire Mill Co., at Temple, Texas, for the purpose of erecting a cottonseed oil mill. The capital stock is $100,000.

The Substantive Colors Company, of New York City, has been incorporated with a capital of $1,200, to buy and sell tar colors. The directors are John C. Chapin, Wm. A. Pollock and David N. Maxon.

The many friends in the chemical and soap grease trades of Mr. A. P. Welch sympathize with him on the death of his estimable wife, which occurred on Monday last after an illness of several months' duration.

The Chicago Paint Company, manufacturer of paint at Chicago, is reported to have confessed judgment for $2,088 in favor of A. C. Ames. It was incorporated two years ago and it claimed a paid in capital of $43,000.

To Mr. J. Seaver Page, the silver-tongued orator of the paint trade, belongs the honor of first prominently presenting the name of Chauncey M. Depew as the Republican candidate for Governor of the State of New York.

The Attorney-General of Illinois seems determined to have a receiver appointed for the Distilling and Cattle Feeding Company, otherwise known as the Whiskey Trust. The officers of the concern deny that one will be appointed.

Decisions by the Board of General Appraisers, based upon previous rulings, affirming decision by collector, have been made in the following cases: Thurston & Braidich, cocoa butterine; Carleton & Moffat, grease; Heroy & Co., glass. The protest of Fritzche Bros. on terpin hydrate has been sustained.

Charter has been asked for the Georgia Pebble Phosphate Co., Atlanta, Ga., its purpose being to develop phosphate mines. The incorporators are John R. Winters, J. C. Greer, A. M. Dobbs, W. B. Metcalfe and others. Capital stock, $30,000.

Mr. J. Seaver Page, of the firm of F. W. Devoe and C. T. Raynolds Co., recently returned from England, where he contested with some noted English shots in pigeon shooting. He speaks highly of his trip and the cordial reception accorded him.

A single match requires from 1.200th to 1.100th of a grain of phosphorus for its production, yet the consumption of matches is so large that it is estimated that the total of 1,200 tons is less than the amount consumed in Europe in their manufacture.

The directors of the Drug Trade Club formally incorporated it by filing papers on the 8th instant with the Secretary of State at Albany, N. Y.

The cotton-oil mills of Alvaredo County, Texas, are reported as having held a meeting and set the price for the season at $6.00.

The assignee of the firm of Queen & Co., Philadelphia, has filed an appraisement in court valuing the merchandise at $104,000. The Committee of the Creditors will soon make a report with recommendations as to the best course to pursue to protect the interests of all concerned.

Ph. H. Karcher & Co. have issued an attachment for $2,972 against the Vermorel & Kimball Silk Dyeing Co.

The coming meeting of the N. W. D. A. will miss the familiar face and voice of Mr. Peter Van Schaack, of Chicago, who sails on the Teutonic on the 19th inst. for another short trip to Europe, it being his ninth trip across.

Proposals are solicited to supply the Navy Yard, at Norfolk, Va., quantities of cement, brushes, glass, tar, pitch, etc. Bids will be opened Sept. 18. Similar proposals are solicited for supplies for the Boston Navy Yard, to be opened Sept. 18; for the Mare Island, Cal., Navy Yard, to be opened Sept. 25, and for the Washington Navy Yard, to be opened Sept. 18.

The Department has received information from the State Department that Italy and Spain are the only countries placing an export duty on lead ores, although Japan places an export duty on pig and bar lead. This, under paragraph 166 of the new act, will result in the continuation of the McKinley rate of duty on those articles so taxed by these countries.

The New York Central Railroad has the reputation of being the best-equipped road in the country, and travelling on this line is indeed a pleasure unmixed with weariness and a desire for the journey's speedy end, which is reached in a marvellously short time, the schedules of this road illustrating the progress of modern railroad speed. It is the ideal road for comfort, speed and safety.

The British Chemical Trade Journal says: "A marked increase of activity is being manifested at ILiverpool docks, consequent on the American Tariff bill, and shipowners are looking forward to a great revival of trade. It is expected that within the next few weeks the various chemical works in the Widnes and Runcorn districts, which have recently been on short time, will be exceptionally busy."

The Sheriff has received an attachment for $1,035 against the New York Fertilizer Company, of this city and Richmond, Mass., in favor of Alphonse Kloh, on a bill of exchange. The company was incorporated under New Jersey laws in March, 1893, with a capital stock of $2,000,000, and several prominent merchants of New York, Philadelphia, Boston and Cambridge, Mass., were interested in it. The offices have been closed for some time past, it is said, since the death of Thomas A. Young, who was the treasurer.

Preliminary arrangements have been perfected for the American Pharmacy Fair, which is to be held in Boston, May, 1895. Everything serves to indicate that it will be a success. This exposition will be the first of its kind ever attempted in America, being for the purpose of educational advantages to the public and the pharmaceutical trade. It will be of the higest possible quality in each and all of its numerous departments. Nearly every article and product in the daily trade of the up-to-date retail druggist will be on exhibition.

The Drug Trade Club was opened on Saturday under the most favorable auspices. The club-rooms at 52 Cedar street were tastefully decorated, and a bountiful lunch was served. The members turned out in force, and it was the unanimous opinion that everything pointed to permanent prosperity of the club. The rooms are now open every day from 9 A. M. to 7 P. M., with the exception of Sundays and holidays.

The Mallinckrodt Chemical Company brought another "muriate of cocaine" suit in the United States Circuit Court, at St. Louis, last week. The company made an importation of muriate of cocaine, and the Board of Appraisers ruled that it was dutiable, as a chemical salt, at 25 per cent. ad valorem. From this the company appeals, holding muriate of cocaine to be a medical preparation, dutiable at only 50 cents a pound. The company alleges that the duty exacted was $1,752 more than was lawful, and it wants a review of the decision of the appraisers.

The Health Board at its meeting late yesterday afternoon passed a resolution revoking on January 1st, 1895, all permits now in force for the transportation of fats and butcher-shop refuse through the streets of this city, and providing for the issuance of special permits in cases where it is shown to the satisfaction of the department that the materials are to be transported in air-tight receptacles loaded on covered wagons, the utensils and wagons to be regularly disinfected in accordance with the regulations prescribed by the sanitary code. As it happens, a new company has been organized which expects to obtain a monopoly of the business, and is already prepared with appliances which to the letter carry out the recommendation of the sanitary superintendent.

The sizes of "cylinder, crown and common window glass, unpolished," which were most largely imported in the fiscal year 1893, were from 10x15 to 16x24 inches, and from the latter size to 24x30 inches. A compilation made by Charles H. Evans, of the Treasury Department, for the Senate Finance Committee, shows that the ad valorem rate of duty on the first of these sizes was 106.19 per cent. under the tariff of 1883 and that of 1890, and is 70.79 per cent. under the new law; on the second of these sizes the duty was 126.66 per cent. under the laws of 1883 and 1890, and is 88.9 per cent. under the new law. There was also a large importation of glass above 24x36 inches, the duties on which were 107.44 per cent. under the law of 1883, 116.79 per cent. under the law of 1890, and are 79.41 per cent. now. There was a smaller importation of glass from 24x30 to 24x36 inches, the duties on which were 124.97 per cent. by the laws of 1883 and 1890, and are 86.93 per cent. now. Of small glass not exceeding 10x15 inches, there was a large importation, exceeded only by the two sizes first mentioned. On this size the duties were 47 per cent. under the laws of 1883 and 1890, and this was reduced to 34.48 per cent. by the new law.

PETROLEUM NOTES.

Mr. Charles B. Matthews, oil refiner, of Buffalo, was on Tuesday last nominated as candidate for Governor of this State at the convention of Populists in session at Saratoga.

Sealed proposals are solicited to supply the Quartermaster's Depot, at Jeffersonville, Ind., 100,000 gallons mineral oil of 135° flash test in cases of two 5-gallon cans. Bids will be opened Oct. 11.

The sheriff has received an attachment for $27,854 against Julius A. Kugelmann and Francisco Vasquez, partners in the firm of Kugelmann & Co., exporters of tobacco, grain and refined petroleum, this city, in favor of Adolfo Casola, of Gibraltar. The firm have been in business since May, 1888, Mr. Kugelmann being the general partner, and Messrs. Vasquez and Casola, both of Gibraltar, being special partners for $20,000 each.

MISCELLANEOUS.

N. W. D. A. Meeting.

President Frank A. Faxon, of the National Wholesale Druggists' Association, has issued the following call to the members. We trust all will accept his urgent request to be present as the meetings promise to prove of more than usual interest and importance to the entire drug trade of the country:

To the Members of the N. W. D. A.:

The Twentieth Annual Convention of the National Wholesale Druggists' Association will be held in New York City, October 1st to 5th inclusive—the first session on Monday evening. It is going to be a great meeting.

To the members of the Association who have formed the excellent habit of attending these annual gatherings, a simple announcement of time and place would be sufficient. They will be on hand, knowing that they cannot afford to be elsewhere. There are, however, members—quite a good many—whose faces are rarely seen at our Association meetings. They leave to others matters in which they have the closest personal interest.

Our Association has accomplished much, but unity and strength in the organization were never more desirable than now.

Questions of vital importance will be presented for consideration at the coming meeting. Let there be a full attendance that the best results attainable may be had. New York City is always an interesting place to visit, and it will be especially so to members of the N. W. D. A. and their wives and daughters during the first week of next month. An enlightened self-interest should take you there. Aside from the value of the meeting in a business way, the social features will be unusually attractive. I am not prepared to speak of the details. The Committee on Arrangements and Entertainment will do that in due time.

The Committee on Passenger Routes and rates, of which Mr. Wm. O. Allison is chairman, has arranged for a uniform rate of one and one-third fare to New York and return from all points in the United States, except portions of the far West, where there will not be enough delegates to secure reduction of rates.

Come and help to make this the largest and best meeting in the history of the Association. Respectfully,

FRANK A. FAXON, President.

The Committee of Arrangements and Entertainment of the National Wholesale Druggists' Association has issued the following circular to the members:

NEW YORK, Sept. 8th, 1894.

The Committee of Arrangements and Entertainment for the meeting of the Association to be held in New York, has, with the approval of the president, fixed October 1st to 5th, 1894, as the date of the convention, the first session being held 8 P. M. on Monday, October 1st. There will be morning and afternoon sessions on Tuesday, Wednesday and Thursday, making seven sessions in all, which the committee believes will be ample for all of the business of the Association, besides allowing the time necessary for two sessions of the Proprietary Association which have been appointed for Tuesday from 9 to 11 A. M. and Wednesday from 4 to 6 P. M.

All of the business meetings, as well as the president's reception, which will take place on Tuesday evening, and the banquet on Thursday evening, will be held at Delmonico's, Fifth avenue, Twenty-sixth street and Broadway. The entire second floor, including the large banquet hall, has been engaged by the committee for the whole period of the convention, and affords ample rooms for committees, and for all the business and social purposes of the meeting.

There will be no evening session except on Monday, the other evenings being occupied by the social features of the program, to which the committee has given special attention without in any way overlooking the more important objects of the convention.

The entertainment specially provided for the ladies in attendance will be such as to very well occupy their time during the days as well as the evenings, and it is the hope of the committee that this provision will be enjoyed by a larger number than has attended any previous meeting.

The convention will close on Friday with a steamboat excursion to the Atlantic Ocean and about the harbor.

In fixing the date of the meeting the committee has been influenced by the fact that the convention of the National Paint, Oil and Varnish Association occurs at Boston during the week following, and as many of our members are also members of that organization, it was deemed desirable that the meetings should be so arranged as to permit them to attend both.

The headquarters of the Association will be at Delmonico's, but in order to have the members together as much as possible the committee has arranged to room such members as have no other choice at the Imperial Hotel, Thirty-second street and Broadway, and the Brunswick, Fifth avenue, Twenty-sixth and Twenty-seventh streets. At both of these houses the rates for room are from $2 per day upward. The Fifth Avenue Hotel, the Holland House, Fifth avenue and Thirtieth street, and the Waldorf, Fifth avenue and Thirty-third street, are also conveniently located, and rooms will be secured by the committee at either of these hotels or any others which members may prefer. If members will advise the chairman of the committee how many rooms they want, with or without bath, and whether their party will include ladies satisfactory provisions will be made for them and they will be notified before leaving home as to the hotel, provided choice of the latter is left to the committee. Respectfully,

JOHN M. PETERS, Chairman.

New Orleans Cottonseed Statistics.

The following table shows the movement of cottonseed and its products at New Orleans for the past three seasons:

Receipts per rail and river.	1893-94	1892-93	1891-92
Oil, bbls	134,427	140,303	138,166
Cake, sacks	63,372	90,648	215,329

Latest Appraisers' Decisions.

SILVER ORE CONTAINING LEAD.

F. A. Hartman against the Collector of Customs at San Francisco, as to the rate of duty on certain silver ore containing lead (process used in making assay), imported per St. Paul, December 20th, 1893.

The merchandise is silver ore containing lead. It was assessed with duty upon assays made by the "dry process," and is claimed to be dutiable according to assay by the "wet process." The decision of the Collector appears to have been based on S. S. 10,037. This ruling, as well as that in G. A. 1,992, related, however, to the ascertainment of the copper content. The common, commercial and correct test for lead is by the wet process, and we susatin that this is the proper mode of assay. For purposes of comparison, the Appraiser made an assay by wet test, showing 20.13 and 19.8 lead, respectively, for the two lots. In the absence of evidence to counteract these figures, the Collector is instructed to use them as basis for the reliquidation of the entry.

COCOA BUTTER.

McLellan, Starr & Brigham against the action of the Collector of Customs at Boston, as to the rate and amount of duties properly collectable on certain cocoa butter, imported December 5th, 1893. Opinion by General Appraiser Wilkinson:

The merchandise is invoiced as "cocoa butter." A printed report to the manufacturers by a London analyst states that it is "a solid, fatty substance, absolutely free from taste or odor," and "a very valuable substitute for the real cocoa butter." The manufacturers write of it as "cocoa butter substitute." It was assessed for duty as cocoa butterine under paragraph 320, N. T., and is claimed to be exempt from duty as a nut oil under paragraph 661 of the same act. From the report of the Chemist of the United States Laboratory at this port, and other evidence in the case, we find: (1) The merchandise is the product of a nut oil. (2) It is not an article commercially known as a nut oil. (3) It is cocoa butterine within the meaning of paragraph 320, and as defined in G. A. 1,174. In the case presented in G. A. 1,174, an article precisely similar to that in question was claimed to be cocoa butterine, and the claim was sustained.

Upon our findings of fact, the protest is overruled. The investigation in the present case leads to the conclusion that the ruling in G. A. 2,360 was erroneous.

English Exports of Alkali and Bleach.

The following figures, which are taken from the official foreign and colonial statistics of the United Kingdom, give the amount and value of alkali and bleaching materials shipped to the undermentioned countries during the month of July, 1894, as compared with the same month of 1893:

ALKALI.

Port.	1893.	1894.
Russia	39,868	14,987
Sweden and Norway	6,500	9,049

Naval Stores at Charleston.

The Charleston News and Courier, in its trade review of the fiscal year ending August 31st, 1894, gives the following information about the naval stores business at that port:

The naval stores business at this port has steadily and gradually decreased during the past year, owing to the continuous work on the pines in this section, which have been greatly thinned out, leaving no new territory to work on. It must also be considered that the cyclone of August last played havoc among our pines, laying trees low for miles and miles. Prices have been fairly good and what business was done proved satisfactory and profitable.

COASTWISE EXPORTS.

The coastwise exports of naval stores from September 1st, 1893, to August 31st, 1894, as compared with the previous year were as follows:

	1893-94.		1892-93.

New Mining Enterprises.

The Western Mining and Development Co., Butte, Mon., has been incorporated with a capital stock of $250,000.

Toltec Gold Mining Co., Denver, Col., and New Mexico, has been incorporated with a capital stock of $5,000,000.

The Apex Gold Mining Co., White Oaks, N. M., has been incorporated with a capital stock of $500,000.

Rulings on the New Tariff.

Secretary Carlisle has issued the following important circular in answer to the questions concerning the ascertainment of quantity in packages raised a few days ago by the New York Custom officials. It applies to every variety of imported goods:

To Collectors and other officers of the Customs:

Section 5 of the Act of August 28th, 1894, provides as follows:

Section 5. That all articles of foreign manufacture, such as are usually or ordinarily marked, stamped, branded or labelled, and all packages containing such or other imported articles, shall, respectively, be plainly marked, stamped or branded or labelled in legible English words, so as to indicate the country of their origin and the quantity of their contents; and until so marked, stamped, branded or labelled, they shall not be delivered to the importer. Should any articles of imported merchandise be marked, stamped, branded or labelled so as to indicate a quantity, number or measurement in excess of the quantity, number or measurement actually contained in such article, no delivery of the same shall be made to the importer until the mark, stamp, brand or label, as the case may be, shall be changed so as to conform to the facts of the case.

The section differs from Section 6 of the Act of October 1, 1890, in requiring a statement of "the quantity of contents" and in withholding delivery of the goods until "they shall be duly marked," etc.

In order to afford reasonable time for compliance with the above section, it will be enforced, so far as relates to the statement of quantity, only upon merchandise shipped from abroad after August 28, 1894.

The Department holds that the indication of the country of origin, under the section, need not necessarily be restricted to the declaration of the name of such country, provided the goods contain unmistakeable evidence of their origin without misleading marks or signs.

It is further held that the requirement in respect to "quantity of contents" applies only to packages and not to separate articles. To interpret the section otherwise would involve the measurement of every spool of cotton and the gauging of every bottle of wine. It may be inferred that the purpose of this enactment was the protection of the consumer from loss through fraudulent over-statement of the numbers or quantity of ar-

ticles contained in any imported package offered for sale.

Certain classes of goods are respectively put up in packages of recognized and uniform quantities. A mere inspection of such package will suffice to determine the fact of their conformity or non-conformity, as the case may be, with the established practice of the trade. If the former condition is manifest no further "indication" of the quantity of contents is needed, as, for example, ordinary bags of coffee and barrels of flour have regular size and capacities, and do not require explicit statements in order to indicate the quantity of contents. It is the purpose of the Department so to construe the section that, without an evasion of its provisions, unnecessary obstruction and hardship to importers may be avoided.

Chief officers of the customs are hereby authorized to decide, in accordance with the above instructions, without reference to the Department, questions arising under the administration of the section above specified.

J. G. CARLISLE, Secretary.

A Ruling on the Free Alcohol Section.

Secretary Carlisle made public last week an important ruling on an internal revenue section of the Tariff Act, in reply to a question on that subject raised by the Collector of Internal Revenue at San Francisco. The inquiry was whether section 9 of the new act, relative to the manufacturing in bond of certain preparations containing alcohol, prohibited the dilution or mixture of distilled spirits in a bonded manufacturing warehouse or only the manufacture of distilled spirits from such dilution. The section permitting manufacture in bond had a proviso "that the manufacture of distilled spirits from grain, starch, molasses or sugar, including all dilutions or mixtures of them, or either of them, shall not be permitted in such manufacture warehouse." The Secretary held that the purpose of the paragraph was to exclude the manufacture of alcohol in any form in a bonded warehouse and to declare that no original alcohol could be produced there. The mixture of distilled spirits and the use of the same as component materials of articles manufactured in bonded warehouses are not, however, prohibited by the section. Such spirits must be introduced into a manufacturing bonded warehouse and not created therein.

This inquiry raises a number of important questions and will result in another circular by the Secretary. As has been noticed in a number of other of the sections in the bill regulating inspection, marking, &c., the application of the principle of manufacturing in bonded warehouses is very much broadened in the new Tariff Act. The McKinley law simply provided, in section 10, corresponding to section 9 of the Act of 1894, that medicinal preparations, cosmetics, cordial, perfumery, &c., and other liquors manufactured wholly or in part of domestic spirits and intended for exportation, might be manufactured without duty or affixing stamps in warehouses of the kind designated in the Treasury hand book "bonded warehouses, class two. These are called in the Treasury hand book "importers' private bonded warehouses, occupied exclusively for the storage of imported merchandise, owned by the proprietors and entered in bond." The paragraph relating to such manufacture in bonded warehouses in the Act of 1894 is of much wider application. It says: "All articles manufactured in whole or in part of imported materials, or of materials subject to internal revenue tax, and intended for exportation without being charged with duty and without having an internal revenue stamp affixed thereto, shall under such regulations as the Secretary of the Treasury may prescribe in order to be so manufactured and exported, be made and manufactured in bonded warehouses similar to those known and designated in Treasury regulations as bonded warehouses, class six."

This section differs from the McKinley law in including any class of articles made of imported materials, or into which imported materials enter to any degree, as well as embracing all material subject to internal revenue duties, and not alcohol alone. There is also the difference that the manufacturing bonded warehouse is to be of class six, instead of class two. That is, it is to be what is known as a "manufacturing bonded warehouse for manufacture in bond of articles for exportation."

Trying to Regulate Alcohol.

No regulations governing the use of alcohol have been drafted by the Department as yet, and in the mean time various interests have appeared before the Secretary of the Treasury to assist him to a speedy decision. On Monday, the 10th instant, he had a long conference with representatives of the wood and grain varnish, perfumery and chemical interests. Mr. James R. Davis, with several New York manufacturers, urged him to frame and promulgate, without further delay, the regulations. It was argued that all of the industries in which alcohol is an important factor are languishing because of the tardiness of the Treasury Department in defining what is alcohol used in the arts, and also whether the regulations will provide for separate bonded warehouses or factories in which alcoholic preparations shall be manufactured.

The Secretary was assured by the representatives of the several interests that they were willing to comply with such regulations as he might issue, but they insisted that a prompt decision on the questions would greatly facilitate the trade between the United States and Canada and the West Indies. It was said that five out of six branches of trade affected by the free alcohol provision can avail themselves of the new law without detriment to the Government, and at the same time reduce the price of medicinal products, perfumery and spirit varnish from 50 to 60 per cent. to the consumers.

It is conceded that a modification of the law will be necessary before it is fully and satisfactorily operative, and for that reason the Secretary was requested to give it a practical test before Congress reassembles, so that its imperfections may be developed and the corrections properly made.

Many samples were presented to the Secretary to illustrate that the opportunities for fraud are not as great as may be supposed, providing the regulations are properly drawn and the manufacturers of the various articles involving the use of alcohol accept the new law in an honorable and patriotic spirit.

The delegation representing the National Wholesale Druggists' Association, headed by George A. Kelly, of Pittsburgh, had another consultation with the Secretary and Commissioner of Internal Revenue Miller Wednesday last for the purpose of presenting further suggestions looking to the enforcement of the provision for free alcohol. Full particulars of this meeting will be found in an interview with Mr. Albert Plaut of Lehn & Fink, in another column.

On Tuesday last a delegation of the wood alcohol manufacturers, headed by Mr. W. S. Gray, appeared before Secretary Carlisle, and endeavored to show him that it was impossible to carry out the law for free alcohol in the arts satisfactorily, and submitted as an argument that in European countries with a more complete customs service and less area to supervise the work was a failure. The Secretary said that he had no doubt that it is now impossible to frame a law that would adequately prevent fraud upon the revenues, but said he should make every effort, nevertheless, to carry out the provision .

Texas Farmers and the Price of Cottonseed.

The farmers in the district of Kossee, Texas, assembled in mass meeting on the 30th ult. to forumlate plans by which they could realize better prices for cottonseed. Mr. R. B. Keeling was elected chairman, and on taking his seat called the meeting to order, when a Committee on Resolutions was appointed and reported as follows:

Whereas, It appears that there has been a combine formed between the four great cotton-oil mill companies of Texas, these mills being located in Houston, for the avowed purpose of buying the present crop of cottonseed at a price far below what the farmers are able to take for it and far below its real value; therefore, be it resolved:

1. That we, the farmers of Kossee and vicinity, solemnly promise each other and do earnestly recommend the farmers throughout Texas to use all diligence and legitimate means to hold their cottonseed until satisfactory prices are realized.

2. We recommend the farmers and merchants throughout Texas to cooperate with us in this move by calling a mass meetings and organizing in every community in the cotton region.

3. We most earnestly recommend that those farmers who are compelled to sell their seed at the present low price to sell it to our home mills, which have been instrumental in bringing about better prices heretofore.

4. That we will hold our seed and agree not to sell the same for a less price than $10.00 a ton.

Savannah Naval Stores Market.

For the year ending August 31st, 1894, the receipts were 268,629 casks of spirits turpentine and 1,000,755 barrels of rosin, an increase of 6,344 casks of spirits turpentine and 14,300 barrels of rosin, as compared with the year ending August 31st, 1893.

Foreign shipments show an increase of 15,313 casks of spirits turpentine and 5,175 barrels of rosin during the year.

Domestic shipments show a decrease of 15,262 casks of spirits turpentine and an increase of 87,205 barrels of rosin, as compared with the year before.

The item of increase in amount of rosin, credited in the table as domestic shipments, during the last six months, may need to be explained. The comparison shows that during the corresponding period in 1893 the rosin shipments to domestic ports were 96,357 barrels, while the shipments for 1894 shows 209,676. During the past six months a very large percentage of the shipments to Europe went via northern ports, thus accounting for the increase in the credit to domestic exports.

The past year was quite an eventful one in naval stores, and many surprises were created in the market. During the fall and winter months prices for spirits turpentine and rosin fluctuated considerably. About the average amount of business was done, however. There was a continual disturbance in the market regarding false packed rosin and irregularities in gauging spirits turpentine. Many hot discussions took place between the buyers and factors as to the rights and claims of exporters regarding the condition of packages when delivered for shipment. Action was taken by the Board of Trade to adjust all differences by employing a supervising inspector, whose duty it is to see that all the laws regarding weighing, gauging, cooperage and sampling are carried out to the satisfaction of all interested. Since the employment of this inspector there has been but little complaint.

The year, taken altogether, was fairly satisfactory to the producers, especially as regards rosin, which brought a fair price throughout the year. All spirits disposed of has been at prices as high as was reasonable to expect, though in endeavoring to hold out for good prices, there has been a great accumulation of stock at this port.

The most notable event occurring during the season was the formation of the factors' "combination" or "trust" during the closing days of March. From the numerous and successful efforts made by buyers during March to bear the price of turpentine, it became evident that sales for future delivery had been made at prices below those then prevailing. Factors thought the price low enough, barely affording the producer to realize cost of manufacture. Lower prices meant great losses to the industry, and no reduction of the indebtedness of producers to the factors.

Realizing that unity of action was

NATIONAL LEAD CO., New York,

necessary, the factors met and completed a thorough organization. Sales of spirits had been made at 2½ and 2¾c the day the organization was effected. The time, therefore, was most opportune. Acting cautiously and conservatively, the selling price was gradually advanced to 28c, at which figure the entire stock in factors' hands was sold. At 28½c, from 6,000 to 7,000 barrels were sold. The sales at 29c and 29½c were insignificant. Stock was rapidly accumulating in the factors' hands, and with the persistent staying-out powers of the buyers, the market gradually became top-heavy.

Sales have been made in large blocks down to 26½c, which was the market price on September 1st. It is thought that as soon as domestic consumers are convinced that bottom has been reached liberal purchases will be made, and the movement become more brisk.

From developments during the past few months, it is believed that if the factors had not taken the bold stand they did, spirits would have sold down to 20c. In fact, early in the season a New York house predicted that spirits would sell lower than ever before.

The Savannah factors made the fight single-handed and alone, the receivers at other ports giving them no assistance whatever. On the other hand, they kept their quotations from 1 to 2 cents per gallon below this market in order to insure quick sales and to avoid carrying stocks. An immense amount of money was kept locked up in naval stores throughout the Summer. At one time the value of factors' stocks of spirits turpentine and rosin were estimated to be over $1,000,000.

Stocks are still large, but there is now a better demand and a firmer feeling in the market. Since the opening of the present naval stores season on April 1st the sales have amounted to about 100,000 casks, at prices ranging from 26½c to 28c per gallon. This is against 130,000 casks sold during the corresponding period in 1893 at prices ranging from 28c to 30c.

The factors and producers are more thoroughly united than ever before and have determined to get in a better position in the future to maintain prices. They will endeavor to reduce the production next season, so that the market will be governed entirely by actual demands. By that time it is expected that tanks will be erected here, and any surplus will then be held without much expense.

WHY ARE THE

National Lead Company's

PURE WHITE LEAD TINTING COLORS

So Popular Everywhere?

For the Best of Reasons, Namely:

THEY SUIT THE DEALER
THEY PLEASE THE PAINTER
THEY ARE WHAT THE HOUSE OWNER WANTS

They Suit the Dealer—Because with a small investment and very little store space he has, with his ordinary stock of Strictly Pure White Lead, a complete assortment of Colored Paints.

They Please the Painter—By enabling him to obtain or match a shade of color without loss of time or material.

They are a Boon to the House Owner—As he can now have his building painted any desired color with the best of pain s—Strictly Pure White Lead.

The National Lead Company's Pure White Lead Tinting Colors are put up in one pound cans, and are so prepared that one pound will tint twenty-five pounds of Strictly Pure White Lead to the color numbered on the can, which, when mixed according to directions, will produce about two gallons of paint ready for use—and the **Best Paint that can be Made.**

These Tinting Colors are for sale by reliable dealers everywhere. No stock of Paint is complete without them. Write to us for full information.

NATIONAL LEAD COMPANY
NEW YORK

It Doesn t Burn Off

Gillespie's Elastic Iron Enamel is especially adapted for use on all Iron Work that is subjected to heat. It dries quickly, and produces a brilliant black finish. Apply with a brush.

This Black Enamel is unequalled for use on Stove Pipes, Registers, Grates, Locomotive and Steamboat Smoke-Stacks, etc. It prevents rust and withstands a high degree of heat without burning off. It makes an old Stove Pipe look like new.

PAINT MARKET.

Note—*Our prices are for large lots except when otherwise specified, and buyers of small quantities must expect to pay an advance on these figures.*

SATURDAY EVENING September 15, 1894.

While other trades are reporting a "boom," the paint trade, so far as this section is concerned, has not yet experienced the sensation peculiar to active trading, except in a jobbing way to meet current needs, which have not been over urgent during the past week. Grinders, as a rule, believe in lower prices, hence very few are stocking up with goods in anticipation of an early Spring demand. Lead in oil and the other oxides are not active, though a fair jobbing demand is reported, and fairly steady prices are obtained. Collections are reported better than they have been for several months past. Vermillion and carmine are both firmer, though not quotably higher. Barytes are attracting considerable attention at the reduction made by the leading domestic makers.

White Lead, Zincs, Etc.

WHITE LEAD.—There has been a decided falling off in the distribution of lead in oil in this section for immediate consumption, though considerable outdoor work is being done both upon old and new buildings. Grinders are not anticipating their future needs, but are only purchasing as their daily wants require, as they are all strong believers in lower prices in the near future for linseed oil, lead and zinc. The price may be quoted nominal at 5@5¼c, with some "special brands" quoted at 5½c, less the usual discount. The new works in the West are expected to be in full blast by the first of the year. Dry lead has been unusually dull; only a few small jobbing sales from store are reported of Western makes at 4 20@4¼c, as to size of the order, less the usual discount. English lead in oil from store is jobbing at 7@7½c, as to make and quantity. The Liverpool market is quoted at 17s (per cwt), but for a round lot in casks this can be shaded.

RED LEAD.—Rather more inquiry is reported for domestic to meet current wants, which are unusually large for this season of the year. While there has been no change in regular schedule prices, corroders are meeting competition when it arises, at 5¼@5¾c, as to section and quantity, less the regular discount. German makes are very much unsettled, owing to the sharp advance abroad. Consequently, importers are conservative in their offerings of round lots for future delivery under 5½@5¾c, as to make and quantity. English red lead is quoted at 14s per 112 lbs, less 2½ per cent. discount, but for a round lot in casks this can be shaded.

LITHARGE.—A better demand is reported for spot goods for distribution among the various glass factories which are beginning to light their fires. Sales are reported of 50 tons at 4¼@4¾c, as to section, make and quantity, less the usual discount. The demand from the rubber trade is not urgent at the moment, only small retail sales being reported at current prices. The higher grades, while not active, are meeting with a fair jobbing demand, at prices ranging from 5¾@6¼c, as to quality and quantity.

PIG LEAD.—There have been considerable transactions in both spot and futures during the past few days, the former at 3.12½@3.15c, and the latter for November and December at 3.10c. At the close, 3.10c was bid and declined for several hundred tons for October, 3⅛c being lowest named for near future delivery, while some holders were asking 3.20@3¼c for spot. The London market has ruled steady at £9 18s 9d for soft Spanish.

ORANGE MINERAL.—There is a decided improvement in the demand for domestic, both for prompt and for forward delivery, at 6½@6¾c, as to quantity, less the usual discount. French is selling rather more freely for forward delivery at the recent decline. For round lots to arrive they are quoting 8½c, while for jobbing parcels 8¾@9c is named, as to quantity and

Which is Quick Process White Lead?

EXTRACT FROM REPORT OF F. M. MULLER, CHEMIST.

"The **buckles of lead** used by the **DUTCH PROCESS CORRODERS** are **ONE-EIGHTH (1-8 OF AN INCH THICK,** and a cube one-eighth inch square weighs 267 milligrams. By actual count under a powerful microscope it required **SIXTY-FOUR THOUSAND (64000) particles of atomized lead** used by the **Carter Co. Process** to weigh 267 milligrams, or to equal a cube one-eighth (1-8 of an inch square, or it would take **FORTY (40) particles** of lead placed one on another to make a thickness of one-eighth of an inch."

The Carter Co. expose the fine particles of blue lead to the corrosive agencies (The same agencies used by the Dutch process) for **TEN DAYS** and nights before a thorough corrosion takes place.

Now if the **atomized particles** of blue lead **were AS LARGE as the thickness of the buckle** used by the **"DUTCH PROCESS" CORRODERS** it would require **FORTY TIMES** the length of time, or **FOUR HUNDRED (400) DAYS** for complete corrosion.

The **"DUTCH PROCESS" CORRODERS** turn out their white lead in **ONE HUNDRED (100) DAYS,** which shows conclusively that **THEY CORRODE FOUR TIMES AS FAST AS THE CARTER CO.**

holder. There are some outside makes which are being offered for future delivery at 7@7¼c, as to quantity and date of shipment. German is more or less unsettled, owing to the advance abroad in goods for prompt shipment, for which agents are quoting 6½@6¾c, as to make, quantity and date of shipment, while jobbing parcels from store are held at 6¾@7c, as to quantity. English is nominally quoted at 6¼c, though late mail advices quote the London market at 22s (per cwt) for small packages, while a shade less would be accepted for a quantity in casks.

ZINCS.—Trade during the past week has fallen off to some extent, as many of the large grinders are not disposed to stock up in anticipation of next Spring's trade, which is expected to be good, consequently they have been taking only limited quantities upon their regular contracts. There is not much disposition to make new contracts, as nearly all the large buyers are looking for lower prices to compete with white lead. For the present, prices remain unchanged at 3½c for contract lots, and 4@4½c for jobbing parcels as to quality. The price abroad for German has advanced equal to about 5½c here. As yet the agents for the French have made no change in their price list, though quite a sharp advance has taken place abroad since the new tariff went into operation.

A recent arrival of German is being offered from dock at 4¾@4⅞ as to quantity.

REDS.

CARMINE.—The increased activity caused by the tariff settlement does not abate, but is well continued, and a fair amount of business is reported as being done. The asking price by the majority of dealers is $2@2.10.

VERMILION.—There is no special demand for this color. An ordinary routine business holds the market steady at the prices previously quoted. English is offered at 59@60c and American may be had at 50@51c, according to quantity.

VENETIAN RED.—Considerable activity is noticeable. There is much better feeling in the trade, and inquiries are frequent, followed in a majority of cases by orders for at least small lots of goods.

BLACKS.

CARBON.—Activity has been steadily increasing for several weeks, and the market now presents a very healthy and firm appearance. Large quantities might be bought at 6c, while for small lots 7c is asked.

LAMPBLACK.—Manufacturers report a much better business than that in progress a year ago. The last month has witnessed a decided revival of trade. Commercial is quoted at 3½@8c, and fine spirit 20@30c, as to grade and quantity.

Carbon		6 @ 7

Ivory		9 @20
Lamp, commercial		3½@ 8
refined		8 @12
calcined		12 @20
fine spirit		20 @30

BLUES.

PRUSSIAN.—Is in better demand than was witnessed a short time ago. Consumers take a better interest than formerly and buy in slightly larger quantities. Prices are quoted at 30@35c.

ULTRAMARINE.—Is asked for to a moderate extent. Sales do not exceed jobbing quantities, consumers buying only as their wants dictate. Soluble is steady at 40@45c.

Celestial		5½@ 8
Chinese		40 @45
Prussian		32 @35
Refiners'		60 @70
Soluble		40 @45
Ultramarine		7 @25
Verditer		25 @30

BROWNS.

UMBERS.—Only ordinary features present themselves. Prospects are brighter for an increased demand. Holders are slow to reduce prices to conform to tariff reductions.

SIENNAS.—Are in moderate request. Negotiations are chiefly for supplies to replenish stocks.

Sienna, Italian, burnt & powdered		3¾@ 4¾
burnt lumps	℔ lb.	1½@ 3¼

GREENS.

CHROME.—Is steady, though not active. There is a fair inquiry, and occasional sales, but the interest generally manifested is of an indifferent sort.

PARIS.—Business has become once more only the ordinary routine trade, and no special activity is looked for during the remainder of the season. Pure is quoted at 20@23c.

Chrome, chemically pure		22 @26

domestic	℔ ton.	$12 @20

Miscellaneous.

BARYTES.—There is a fair distribution in progress, and sales are for most part of a jobbing character. Holders generally concede reductions in accordance with changes in the tariff. Prime white may be had at $16@18, as to quantity.

CHALK.—No change has occurred in prices, and in general appearance the difference between the present market and that of a week ago is very slight. A fairly steady inquiry continues to be received. Prices are quoted at $2@2.25, according to quantity.

CHINA CLAY.—The condition of the market shows a steady but gradual improvement. Inquiries are more numerous, and sales larger than was noticed a few weeks ago. Consumers were practically bare of stocks, and are purchasing in light quantities. We quote the price of imported at $12@17.

TALC.—Although the inquiry has become a more general one the market is quiet and purchases are made only as consumers deem such action prudent to replenish stocks. Prices are considered nominal.

WHITING.—Orders continue to arrive from the West, which proves the main field for operations during the present season. The trade is considered a fair jobbing one. Prices are unchanged and are quoted at 55@60c for extra gilders; commercial is held at 35@45c.

MIXED PAINTS.—While there are growing indications of seasonable activity in preparation to meet the demands of the autumn trade, grinders and makers are not looking for a pronounced revival of business and are not making more goods than they think they can easily dispose of.

PUTTY.—There is still the same good demand which was reported some weeks ago. The continuance of activity proves that the fall season commences very early this year, and that there is also a good deal of briskness about the early movement, which it is hoped will be well sustained as the season advances. Prices are firm.

Varnish Gums.

The surplus of stocks continues to be eased off under the stiffening demand for the various grades of gums. Makers of varnish are coming more prominently into the market than they have done for a long time and their stocks are, as a rule, almost entirely depleted. Consequently the amount of sales have increased and the market looks better and brighter. The foreign market is slightly easier. Prices are held at the following quotations: Zanzibar, 35@65c; Manila, 9½@25c; Kouri, 17@18c for standard and 45@65c for pale selected, and Damar, Batavia, 13½@16½c.

Rock Emery Millstones
TRADE MARK
MADE TO FIT ANY MILL FRAME.
Fastest Grinders Known. Cheap. Durable.
Nothing Cuts like Rock Emery. Rock Emery is next to the Diamond in Hardness.
These Millstones are made of Large Blocks of Rock Emery in its natural state, set in Bronze, which is stronger, and nearly as hard as cast iron. They Never Glaze. The Emery face requires No Dressing—Stays Sharp. More of these Millstones are now in use than all other modern grinders together. Rock Emery Millstones grind everything.

Colors in Oil.

The activity consistent with the anticipation of a fair fall trade is beginning to set in, but as for stocks to be disposed of with the new year, there is little encouragement to grinders to make up large stocks, and they are operating on a very conservative basis.

Glass.

WINDOW GLASS.—All of the factories have now signed the scale, accepting a 22½% reduction in wages, and though fires will be started as soon as many of the works have been overhauled it is thought that new glass cannot be had before the lapse of six weeks. Though the demand is good, it is only to supply the immediate wants of consumers, as lower prices are confidently expected. The spot price remains unchanged, as all stocks now held by dealers were made under the old scale, but for new glass, future delivery, carloads from the factory are selling at 85 and 5@85 and 10. Even these prices might be shaded an extra 5%, say 85 and 10@85 10 and 5. Importers will probably be forced to lower their prices in due time, but they claim they are now selling on the basis of the Wilson bill rates, though the higher duties of the Senate bill were finally adopted. A new list has been published by a Boston house, but discounts have not been furnished the trade as yet, hence it cannot be determined just how much of a reduction, if any, this house is disposed to quote.

PLATE GLASS.—A good demand is in progress at 70@70 and 10. At the meeting held on the 8th instant, at which were present the manufacturers and jobbers of the United States, final arrangements looking to a consolidation of the interests for mutual benefit were not perfected, though it was confidently expected they would be.

On the 70 in. bracket and above, French is quoted $1 higher on single and $1 50 on double. An additional 10 per cent. will be charged for all glass more than 40 inches wide. All sizes above 52 inches in length, and not making more than 81 united inches, will be charged in the 84 united inches bracket Sizes above—$10 per box extra for every 5 inches on American, and $15 on French. Discounts on American, 80 & 20@85, discount on French S. & D., 80 & 10.

St. Louis Paint Market.

(Special to the Reporter.)

WHITE LEAD.—The improvement noted in our last continues, and it is believed this will influence an early stoppage of shading of prices as an inducement to sales. Corroders' prices continue at 6c for usual quantities, with customary rebates and discounts off.

PIG LEAD.—While the market has been in an unsettled condition, still there was but slight variations in prices for spot stuff. There was more or less scarcity of ready supplies. The last sale approaching spot was 100 tons for Sept. 20 delivery, at $2.95, at which the market may be nominally quoted, and on the downward tendency. Futures are, if anything, more unsettled. One sale early October changed hands at $2.95, but later it dropped to $2.90 offered, with no takers, and it is likely to go still lower. Receipts for the week are as follows:

RECEIPTS.

This week, pigs	32,315
Last week, pigs	14,360
Total to date, pigs	918,788
Same time last year	962,246

SHIPMENTS.

This week, pigs	13,202

Total to date, pigs	728,846
Same time last year	692,337

LEAD AND ZINC ORE.—Owing to a lack of cars and drop in prices, shipments of ore were lighter. Zinc declined $1 per ton, and lead $1 per 1,000 lbs. The production of zinc ore is lighter than for nearly two years, and few new mines are being opened, and while spelter does not now warrant an advance nor show an inclination upward, it is nevertheless believed at the seat of production a lessening of the output and the creation of a zinc scarcity will force an increase in prices. This ore has been sold closer in all camps this Summer than for five years, and but a small surplus is now in sight. Sales for the week were 5,014,970 lbs. zinc ore and 1,055,460 lbs. lead ore.

Petroleum Pipe Line Statements for August, 1894.

GROSS RECEIPTS.

OIL MARKET.

Note—*Our prices are for large lots except when otherwise specified, and buyers of small quantities must expect to pay an advance on these figures.*

SATURDAY EVENING, September 15, 1894.

The feeling of renewed confidence which recently set in continues to strengthen, and in certain lines improved trade is even noticeable in the purchase of larger stocks by consumers when in the market. This is looked upon as a good indication of the sense of security which the public is at last beginning to feel. Cocoanut and linseed oils are both quiet but firm, buyers and sellers of the latter still being far apart in their views. Cottonseed oil is also held firm, with the general tendency toward higher values. Lard, at the moment, is "off" several ponts, but it is thought to be only momentary. The high price of lard has placed its oil on a still firmer and higher basis than it occupied a week ago, and the demand is said to be very strong. During the past month the demand for mineral oils has very materially increased, and the various grades now exhibit an activity not seen for a long time.

LINSEED.—There is a decided boom in the seed market at the West. Cash seed having sold on Friday at $1.37, October at $1.34½, December at $1.38, and May at $1.42. The St. Louis market is also advancing, in sympathy with Chicago. It is reported that some of the large Western crushers are taking advantage of the rise, and have been free sellers of future seed. So far there has been no change in the oil situation, except that crushers are less inclined to sell below 50c, at which they report only a moderate jobbing demand. Early in the week one car of State oil was sold at 47c., and later 3 cars at 48c. delivered at buyer's works, which was figured out as equal to 46c. Late 49c. was bid for 10 cars October delivery. Paint grinders are not inclined to anticipate their future wants by purchasing future oil at 50c, though they may be obliged to pay more later on, consequently they are purchasing only as their daily wants require. We note sales of 10,000 gals. city oil at a shade under 50c. The market closes strong at 50c for raw domestic and 48c at Chicago, 51c for Calcutta raw. There are reports current that an advance of 2c will probably be made in Western oil early next week.

COTTONSEED.—During the week under review the market has advanced several points, notwithstanding that lard has been very much unsettled and closing on Friday twenty-five points lower than it did on the preceding day. One reason given for this advance is scarcity of stocks, and yet odds lots daily come to the surface from the most unexpected points. While there is no doubt but that stocks are light, holders who have supplies are witholding for the present in anticipation of a squeeze early in October, when those who sold new oil for September delivery will be obliged to cover their sales. So far all the samples of new crude which have come to hand are off quality, and should the rains continue in the cotton belt it is more than probable that this season's output will be largely off grade oil. There is very little new crude being offered for future delivery, though 12 tanks sold for October-January, 4 tanks per month, at 26c, loose, f. o. b. mills. The West has been making more inquiries, both crude and refined, and offers of 27c, loose, f. o. b. mills, have been declined for several thousand barrels of the former, and 30c loose for the latter, at Memphis. There has been a large demand for white oil for export and at the close 40c was quoted, with only limited offerings. The large demand for compound lard in this section has stimulated the buying of summer yellow on the part of some of the refiners who were not overstocked with cheap oil. An offer of 34c was declined for 2,000 bbls prime summer yellow which has been in store for several months, for which 35c was asked. Later, however, it was reported sold at 34½c, though we are unable to confirm the sale, but there is no doubt the sale was consummated at above price. The Union Oil Co., of Providence, have advanced their winter oils 2c per gallon. The demand for off summer yellow from the soap kettle has been checked by the advance, as with present prices of tallow and other kindred greases they are unable to pay over 31½@32c for off oil. The market closes firm at 30c. nominal, for prime crude; 26@29c for off quality; 35@36c for prime summer yellow; 33@34½c for off summer yellow, as to quality; butter oil, 38c; white, 40c, and soap stock, 1⅜@1½c. The sales, in addition to those reported above, consist of 500 bbls. prime summer yellow at 35c; 100 bbls. choice butter oil at 37c; 250 bbls. choice white oil at 38c; 250 bbls. do at 38c.; 200 bbls. butter oil at 37c; 1,300 bbls. of prime summer yellow at 35c; 250 bbls. choice white oil at 38c; 5 tanks, or 650 bbls., prime summer yellow, loose, delivered here, at 31½c; 750 bbls. choice white oil at 38c; 500 bbls. prime summer yellow at 35c; 100 bbls. off yellow at 33c; 50 bbls. off crude at 30c; 100 bbls. off yellow at 32½c; 150 bbls. off yellow, nearly prime, at 34½c; 50 bbls. off yellow at 33½c; 1,000 bbls. choice white oil at 38½c, and 200 bbls. soap stock at a shade under 1⅜c. Messrs. Charles B. Tainter & Bro., in their review of the market, say: "Since our last advices, although lard is somewhat lower, the tone of our oil market is firmer, and sales are reported at an advance of one cent per gallon. This we think due mainly to reports of too much rain in the cotton belt and the fear of bad seed. It is a fact that, so far, the first run of crude in the few mills that have started up is said to be off, and if the rains continue early contracts for deliveries of prime oil will prove difficult to fulfil. It is as yet too early to ascertain the extent of the damage, but it would seem to be quite serious in the Southwest, and must naturally widen differences between prime and off oils, and enhance the value of choice grades. So far exporters pay little attention to our improving market, and the state of trade is by no means good, but should the current reports of damage be confirmed and the bad weather continue, a sudden change may be seen. With a prospect of inferior seed, the price should be kept down, to give the mills an ample margin on the quality of their oil."

New Orleans Cotton Oil Market.

(Special Telegram to the Reporter.)

Market quiet, with few inquiries or offerings. Prime Texas crude 25c loose, asked 26c loose, bid, for October shipment. Cake and meal are dull at $21 long ton, f o b. Seed very poor owing to constant rains.

Memphis Cotton Oil Market.

(Special Telegram to the Reporter.)

New oil not yet offering. Buyers and sellers are apart in their views. For early shipment 27c, loose, is declined. Prime summer yellow is held at 31c, loose, f o b. Continued rains make crop backward and likely damage seed. Owing to bad weather for past three weeks valley crops are considered ten to fifteen per cent. short. Texas mills are holding crude at 26@27c, loose, f o b, as to location.

MICA AXLE GREASE

THE CINCINNATI TRANSFER CO.,
Cincinnati, Ohio.

Mica Axle Grease is very satisfactory in every respect. Quite superior to any axle grease we have ever used before.
W. J. Winterbottom, Supt.

We endorse the above.
Griffith & Hill, Lumber Dealers
Jas. Griffith & Sons, Planing Mill
Springfield, Vt.

I have a large sale of Mica Axle Grease. It wears three times as long as any I ever used. Minor W. Newton.
Eldorado, Wis.

We have sold Mica Axle Grease for five years. It is the best Grease manufactured. C. H. & Buell Anderson
Detroit, Mich.

I have used Mica Axle Grease or about eight years with the very best satisfaction. It doesn't run off the axle in hot weather; and it doesn't chill and harden in cold weather. I have used almost all other makes of axle grease and consider the Mica worth more than twice as much as any other for my use. J. C. Carpenter, dealer in coal and wood,

Cocoanut Oil, Etc.

CEYLON.—While trading is not active, values are gradually assuming a stronger position, both for spot and for goods on way. Several small sales are reported on the spot at 5¾@5⅞c, as to quantity and style of package. For shipments on way, 5½c is asked, while for future sail shipment from the coast 5½c is the lowest named, with 5⅜c bid and declined for 100 tons.

COCHIN.—The recent arrival from London was sold previously for consumption, hence little if any will come on this market for resale. Shipments on way or near by are held firm at 7c. Late shipments from the coast for early 1895 arrival are held at 6⅜c, with 6⅛c bid and declined. Spot lots are held at 7½@7¾c, as to holder.

OLIVE.—The market for spot oil remains dull at 53@54c, as to quantity, at which only a small jobbing trade is reported. For future shipments they are quoting 52@53c, as to quantity and date of shipment, but the demand is light. Olive ports are dull, though held steady at 4¾c for store parcels and 4½@4⅝c for shipments, as to quantity and date of arrival.

Animal and Fish Oils.

COD.—The market is quiet, trading being slow to revive from the long period of uncertainty which has but lately ended. Quotations are sustained on the range of 30@32c, as to quantity and grade.

LARD.—Is still stronger than it was a week ago, and prices have advanced 2c. The demand is moderate at the prices now in force, and the market is very firm, with prime city quoted at 68@70c. Other grades are proportionately lower.

MENHADEN.—The situation has little of interest outside of a routine business. A fair quantity of crude oil has found sale during the week at previously quoted prices. Refined oils are slow of sale. We quote brown strained at 24@25c; light strained, 25@26c; bleached winter, 33@34c; extra bleached winter, 35@36c, and extra bleached winter white, 37c.

NEATSFOOT.—Along with the other animal oils, neatsfoot exhibits extreme firmness. The demand has increased lately; 65c is asked for certain prime holdings. Slightly inferior grades may be had in quantities at reasonable shadings.

RED.—Saponified is active under a well stimulated inquiry, and prices are quoted at 4½@4⅞c. Elaine is hardly active, but is held steady at 37@37½c, as to grade.

SPERM.—The New Bedford market is reported as being quite active, with sales during the week of 1,600 barrels for manufacture at 57c, and the market closes firm with further inquiries for manufacture. In the market for refined oil the quietness is broken by occasional orders for light quantities. Prices are unchanged, and are quoted as follows: Natural spring, 58c; bleached spring, 63c, and bleached winter, 70c.

WHALE.—Crude oil is still very dull, as there have been no sales or even inquiries during the week, but holders are still firm. But little business is being done in the manufactured product. We quote natural spring at 41c, natural winter at 42c, bleached winter at 44c and extra bleached winter, 46c.

Mineral Oils.

BLACK.—"Trade is very much improved," is the comment heard from various sources. There appears to be a good demand for the various grades and larger orders are now filled than were formerly done. Summer is held at 5¾@6c, and 25@30° gravity, 6¾@7c.

LIGHT FILTERED.—Under the present demand there is a good distribution and prices are well sustained. Last month's sales show a decided improvement over preceding months. Quotations are as follows: Light filtered, 12@16c, and dark filtered, 10@13c.

PARAFFINES.—There is a better feeling under way for these as well as the other mineral oils. Orders that now come to hand are for moderately large quantities, and manufacturers feel encouraged under the good distribution now in progress. We quote prices as follows: 25° gravity, 9½@11c, and 28° gravity, 7½@8c, as to quantity.

Oil Cake, Meal, Etc.

The market opened early in the week at $23.50, but subsequently dropped to $23.25, and later declined still further, and is now held at $23. The condition of the market may be considered dull but firm, under a small demand on spot. Sales have been made during the week of about 300 tons. There is some inquiry for future deliveries. Calcutta is still nominal.

Wax, Lard, Tallow, Etc.

PARAFFINE WAX.—There is a well sustained, regular demand and an improved business is being done. Shipments are gradually growing in size. Prices are held on the range of 7c for 135° m. p., 130°, 6½c and 125°, 5½c.

LARD.—Although there has been a slight decline in lard the position is still strong, and the market is quoted for city at 8¾c, being slightly easier at that price.

STEARINE.—The lard decline had a dulling effect upon stearine, which was easier. Western was offered at 11½c on spot, without a steady demand. Oleo sold at 10c. Oleo oil is nominal.

TALLOW.—The situation is nominally unchanged. City was bid at 4⅞c and 5c asked. It is reported there is about 200 tons of Australian tallow bought recently to come to this country. The larger part is sold to the West, though a lot is already imported to this market, which is offered at 6⅛c; this price, however, will probably be shaded rather than incur the expense of storing.

Chicago Oil Market.

(Special to the Reporter.)

LINSEED OIL.—The existing inquiry is of a hand-to-mouth sort, being confined to immediate requirements. Representatives of local crushers are offering oil to-day at 44c. This, however, is a fighting price, and all parties agree that at this figure linseed oil is as cheap as anything on earth.

FLAXSEED.—The stocks at this point have declined 8,922 bushels, although being 404,972 bushels in excess of the quantity in sight a year ago. The official figures are given in the subjoined table:

Grade.	Sept. 8, 1894.	Sept. 1, 1894.	Sept. 9, 1893.
No. 1	580,900	589,822	189,068
Rejected	3,569	3,569	8,065
No Grade	609	609	609
Special bins	19,142	19,142	1,506
Totals	604,220	613,142	199,248

The total movement of seed has exhibited a decline as regards both receipts and shipments. For the period under review the former have aggregated 353,805 bushels. Shipments have been 170,252 bushels. The official report of arrivals shows inspections to have amounted to 307 cars (nearly all graded as No. 1). The outward movement has been quiet. Total inspections out amount to 72,538 bushels, of which all but 2,200 were withdrawn from store. Only a moderate proportion of the seed arriving has come on the market, and as regards futures, the selling element appears to be awaiting results. Gradually a stronger feeling will develop. Reported sales of cash flax foot up some 145 cars, besides a few bag lots. Prices have ranged from $1.25 to $1.31. In the speculative market considerable business has been done. Sales of September to the extent of about 30,000 bushels have been effected, quotations advancing from $1.22½@1.27½. Sales of October to the extent of 80,000 bushels were effected on 'Change at $1.25@1.28. The only deferred delivery which attracted attention was December, of which option there were buyers for some 100,000 bushels, who paid $1.25½ at the opening, and $1.33 at the close. The advance is due, in part, to reports of heavy rains in the Northwest, which are said to have injured the crops in that section. The market to-day was unsettled. Cash seed opened a shade lower, but reacted and closed unchanged. A weaker feeling was noticeable in the speculative market, quotations closing at about ½@1c lower all around. Southwestern seed was about ¼c to 1c below prime flax from the Northwest. The latter ranged at $1.30@1.31. September sold at $1.29@1.30½. After selling at $1.29, October was offered ½c lower, with $1.28 bid and no sellers. December sold down from $1.33 to $1.31, closing with (unaccepted) bids at the inside.

OIL CAKE.—The domestic demand is fairly good, but for export there is only a moderate inquiry. Nevertheless, there are larger stocks in sight and holders are not quite so firm in their views. Sales for foreign shipment have been made at $21.50 per ton, net, at Chicago, and that may be said to be about the market. The drought all through the West has induced the use of artificial feed. In consequence, cake is in good request.

OLEO OIL.—The local market exhibits a decided improvement, as regards both demand and value. Nevertheless, exports have increased from 2,600 to 3,700 tcs this week. Cables from Holland indicate an appreciation of both trade and prices. Reported sales aggregate 4,000 tcs. Stocks in first hands are said to be about 19,000 tierces. Cables indicate an advance for extra grades, medium oil being still slow of sale. Some choice brands brought 57fl, and the market may be said to have appreciated, on the whole, 1fl, 56fl being the current price for fancy makes, with excellent medium brands commanding 51@54fl.

LARD OIL.—Trade is quiet, certainly not exceeding normal proportions for the season. To-day's quotations are as follows: Extra, 59@60c; extra No. 1, (about) 50c; No. 1, 37c, and No. 2, 35c. For the lower grades there is virtually no inquiry.

NEATSFOOT OIL.—The inquiry continues tame, and nothing but the curtailment of the output keeps prices up. Few sales are reported, but quotable values range from 40@60c, according to grade and brand.

TALLOW OIL.—At 50c, tallow oil is moving into consumption at about a normal pace.

The Price of Lard in Chicago.

The following table shows the range of of prices of lard at Chicago during the past week:

Sept.	Cash.	Sept.	Jan
10	8 90 @9 05	9 02½@ —	8 32½@8 42½
11	8 90 @8 92½	8 90 @9 00	8 25 @8 45

13	8 95 @9 05	8 95 @ —	8 35 @8 47½
14	8 85 @8 90	8 80 @ —	7 15 @7 32½
15	8 85 @ —	8 80 @ —	8 05 @8 15

(For St. Louis Oil Market see page 25.)

TRADE ITEMS.

Samuel Heitshu, of the Snell-Heitshu & Woodward Co., of Portland, Ore., was in the city during the week.

E. H. Ferguson, President of the Kentucky Refining Company, has returned from a business trip to Europe, which proved satisfactory.

Mr. Edward Mallinckrodt, of the Mallinckrodt Chemical Co., of St. Louis, stopped here for a few days on his way home from the Adirondacks, where he has been spending his vacation.

A convenient manual, containing the new tariff law and all laws now in force relating to tariff matters, has been published by R. F. Downing & Co., this city. As it also gives the duties on articles arranged in alphabetical order it is very handy for speedy reference.

Bromo-oxyden, a powerful deodorizer and very effective disinfectant and antiseptic, is for sale by Chas. Cooper & Co., this city. As it is non-poisonous and does not stain clothes and is economical to use, it is becoming very popular with physicians, hospital attendants and all who have occasion to use an effective disinfectant.

It appears that it is not clearly understood that the one-and-one-third rate to members attending the N. W. D. A. meetings extends also to members' families and friends accompanying them. It includes ladies and all others attending or accompanying those who attend. The rate goes into effect three days before the date of first meeting, exclusive of Sunday, except at distant points, where a longer time is allowed by the railroads. The time limit for leaving New York is three days after the date of final adjournment, which may possibly not take place until Saturday, in which case the following Wednesday would be the final limit.

Ferdinand A. Marsily, commission merchant at 18 Beaver street, committed suicide last Friday morning by shooting himself at his residence, in this city. The reason assigned for this act is continued ill health, as he was known to have been suffering for some time from rheumatism and kidney trouble. Mr. Marsily was born in Belgium in 1830 and came to this country when a young man. The firm of which he was a member was formerly known as Withoff, Marsily & Co., and is one of the oldest concerns in this city, doing an extensive business in shipping oil, lard and kindred products to Europe. Mr. Marsily was a member of the New York Produce Exchange and the Maritime Exchange. He leaves a widow, but no children. He had just returned from Europe, and it was his intention to go there again on a business trip.

The steamer Capac, which sailed from Coronel on August 4th, taking on board at the various ports of call a large cargo consisting chiefly of silver ore and nitrate of soda, had a narrow escape from total destruction by fire at sea while on the voyage to this port. On August 11th, in latitude 44 south, longitude 61, fire was discovered among the coals, in the midship bunkers. A stream of water was played on the coals, and the fire was apparently put out, but not until it had burned down to the flooring of the bunkers, and choked the bilgepump. On the 16th fire was again discovered in the coal-bunkers. The fire was, however, after hard work, got under control, and when off Rio Janeiro, Capt. Thomas decided to put into that port and discharge the coals from the bunkers. Rio was reached on August 18th. Considerable damage was done to the fittings of the vessel, and it is believed that a large portion of the cargo of nitrate is damaged by water.

NAVAL STORES.

Note—*Our prices are for large lots except when otherwise specified, and buyers of small quantities must expect to pay an advance on these figures.*

SATURDAY EVENING September 15, 1894.

SPIRITS TURPENTINE.—There is general expectancy on the part of every one interested in the market, awaiting fresh developments of the peculiar situation at Savannah. News from that quarter confirm the report that there has been nothing doing by the "combination" for the last three days. Outside parties are said to be offering at less than 26c. Stocks in the Southern market are heavy, of which the "combination" holds a good share. The Savannah Morning News, under date of September 13th, says: "It was reported to-day that a bid had been submitted to the combination committee to take a large block at a certain price, not stated, and that the committee had considered the offer and quoted a counter price." It is generally thought by dealers in this market that prices will not fall much below present quotations, despite the ominous report from certain quarters that the "combination" is weakening and the Southern market is apt to go to pieces. Southerns are now quoted in this market at 28½c, and machine, 28¾c. But the former price would generally be accepted for all grades.

ROSINS.—There is very little being done, the market being generally a waiting one, every one expecting interesting developments from the South. Good strained is held slightly better, K., M., N. and W. G. are weaker than at our last writing. We quote common at $1.15; good strained, $1.20; E., $1.35; F., $1.55; G., $1.75; H., $1.90; I., $2.05; K., $2.20; M., $2.45; N., $2.75; W. G., $2.90, and W. W., $3.20, with an easy demand for all grades.

TAR.—A fair demand exists and regulars are quoted at $2.00 and oil barrels $3.85@4.00.

The statistical position of naval stores in New York for week ending Sept. 14, 1894, as given by Messrs. George L. Hammond & Co., was as follows:

PETROLEUM MARKET.

SATURDAY NOON, September 15, 1894.

As week succeeds week with scarcely a variation in price and no business accomplished on the local exchange, the dreary monotony of the speculative market has an enervating effect upon those whose duties require their attention about the bull ring, and the average operator only occasionally leans against the railing and in a listless way asks what is bid or offered. The resuscitation of interest in speculative trading appears to have been abandoned, and the maintenance of a reserved space for trading in petroleum certificates is little more than a farce. The only matter of interest during the past week has been the pipe line statements for August, which, although showing a very large decrease in stocks, had no effect on the market. A tabulated synopsis of these reports, with comparisons, is printed on another page, and editorial comment will be found in its appropriate place. News from the producing fields has been meager and of no special importance or significance. The difference between runs and deliveries has been fully as large during the past two weeks as it was last month, and a further large shrinkage in stocks may therefore be expected. A synopsis of the reports of the three principal pipe lines is appended:

NATIONAL TRANSIT CO.	July.	Aug.
Outstanding certificates.	3,469,000	3,458,000
Credit balances	1,977,965	1,594,430
Net stocks	5,446,965	5,052,430
TIDEWATER PIPE CO.		
Outstanding certificates.	..	..
Credit balances	504,569	443,726
Net stocks	504,569	443,726
BUCKEYE PIPE LINE CO.		
Outstanding certificates.	16,500,000	16,500,000
Credit balances	3,004,651	3,236,628
Net stocks	19,504,651	19,736,628

The transactions during the past week show no change from those of the previous week, no sales having been effected. The highest price of the week was recorded on Saturday, when 83c was reached. The lowest point of the week was 82¾c, and was touched on Wednesday. The opening price last Monday was 82⅞c, and the close this noon was 83c, showing a gain of ⅛c as a result of the week's trading, while the extreme range of fluctuations for the week was ¼c. The range during the corresponding week last year was 64@65½c.

Following is given the opening, highest lowest and closing figures for each day, in tabulated form for comparison:

National Transit.

	Opening.	Highest.	Lowest.	Closing.
Monday	82⅞	83⅛	82⅞	82⅞
Tuesday	82⅞	82⅞	82⅞	82⅞
Wednesday	82¾	82¾	82¾	82¾
Thursday	82⅞	82⅞	82⅞	82⅞
Friday	82¾	82¾	82¾	82¾
Saturday	83	83	83	83

The amount of daily sales and total for the week follow:

Monday	0,000
Tuesday	0,000
Wednesday	0,000
Thursday	0,000
Friday	0,000
Saturday	0,000
Total for the week	0,000

The clearances at the several exchanges were as follow:

	New York.	Oil City.
Monday	0,000	0,000
Tuesday	0,000	0,000
Wednesday	0,000	0,000
Thursday	0,000	0,000
Friday	0,000	0,000
Saturday	0,000	0,000
Total	0,000	0,000

Following is the range of prices of National Transit certificates during the corresponding week last year:

Sept. 11	64⅝@65
" 12	64¾@—
" 13	64½@—
" 14	64 @—
" 15	64 @—
" 16	65½@—

Refined and Products.

An unusually large number of tank vessels have been on this side during the past week, and their requirements have swollen the aggregate exports to a very large amount. Among the number were several not included in the regular fleet and were brought into service as the stocks abroad are light and the distributive demand rapidly increasing. For barrelled oil for export the demand has been light. The total engagements during the week foot up nearly 400,000 bbls. The price of barrelled oil has remained nominally unchanged at 5.15c for New York loading, and at 5.10c for Philadelphia at 2.65c here and 2.60c at Philadelphia, loading. Bulk oil has also been steady. The principal foreign markets are steady. To-day's quotations by cable were: Antwerp, 12⅛f; Bremen, 4.70m; London, 3¾@3⅞d, and Liverpool, 3¾@3⅞d. Freight rates are steady at 2s@2s 3d hence to London, and 2s 3d@3s 3d to Continental ports, as to port and vessel. Home trade lots have been in good request, and are firm on the basis of 7⅜@7½c for 150° water white, and Western at 7¼@7⅜c.

Cases for export have been in active request, and sales of about 400,000 are reported. The price for plain tops remained unchanged at 6.35c. Freight rates are steady. The nominal rates for large vessels are: For Java, 16@18c; Japan, 15@18c; Yokohama, 22@23c; Calcutta, 12½@13c; Bombay, 15@16c; Rangoon, 13@14c; Singapore, 19@20c; Hong Kong, 17@18c; Shanghai, 21@22c; Saigon, 15½@16c, and for Penang, 19@20c.

Crude for export has been in light request, and sales of only 10,000 bbls are reported. Washington crude is quoted at 6.00c in bbls and 3.00c in bulk. Cases for export have been neglected, and no sales are reported.

Prime city naphtha has been steady at 5.75c. For export sales of 13,000 bbls are reported.

Western residuum is nominally quoted at 2⅝@2¾c in bulk at seaboard. Barrels are quoted at 5@5¼c. Lima residuum is offered at 4¾@5c in barrels.

Closing Quotations.

Barrels, cde eq	780,874	16,412,090	16,786,197

CLEARANCES FOR THE WEEK.

During the week ending Sept. 14, and since January 1, the clearances of petroleum, in gallons, from the port of New York were as follows:

	Week.	Year.	1893.
Refined	15,972,851	311,576,695	306,926,847
Crude	....	2,806,762	5,924,045
Naphtha	....	2,816,502	6,730,465
Residuum	....	8,350	251,400

EXPORT STATISTICS.

The following table shows the total exports from the port of New York and from the United States reduced to crude equivalent, in gallons, for the week ending Sept. 14; also total shipments to date with comparisons with 1893:

From N. Y. for week ending Sept 14	21,297,134
Total from N. Y. from Jan. 1, 1894	419,687,879
Same period last year	422,325,627
Decrease	2,637,748
From U. S. for week ending Sept. 14	31,291,639
Total from U. S. from Jan. 1, 1894	723,235,575
Same period last year	698,575,302
Increase	24,660,273

TOTAL EXPORTS FROM DIFFERENT PORTS.

	1894.	1893.
New York	419,687,879	422,325,627
Philadelphia	263,742,350	250,902,529

MAVERICK OIL CO.

REFINERS AND SHIPPERS OF

Maverick Standard Burning Oils, Naphthas and Gas Oil

Of all Grades in Bulk, Barrels and Cases.

REFINERY: Chelsea Street, EAST BOSTON.
OFFICE: 61 Broad Street, BOSTON.

STATIONS: East Cambridge, Lynn, Brockton, North Andover, Stoneham, Natick and Braintree, MASS., and Nashua and Great Falls, N. H.

Proprietors of the Well-known Brand of

CENTENNIAL SAFETY OIL

This oil, by its High Test, is safer in use than any other Burning Oils, and gives the most brilliant light. It does not crust the wick, and is free from disagreeable odor and smoke in burning.

Oil delivered by the car load in bulk or in barrels at any point in New England.

TIDE WATER OIL COMPANY.

Manufacturers of

PARAFFINE OILS

Crude and Refined Paraffine Wax

Cylinder Stocks, Neutral Oils

BLACK OILS

SELL TO JOBBERS ONLY

NEW YORK
12 Broadway,

BOSTON
11 Custom House St.

PRATT'S PATENT PREPARED GASOLENE

Adapted to all kinds of Gas Machines 86, 88° and 90° Gravities.

Pratt's Deodorized Stove Gasolene For use in Vapor Stoves. Made in accordance with the recommendations of the Vapor Stove Manufacturers and guaranteed not to smoke, smell or gum the burner.

Redistilled Naphthas Also Fuel Oil, Lima Crude, Distillates, &c.; prepared especially for Gas Companies and obtainable either in barrel or tank car.

Boulevard Gas Fluid For use in Vapor Street Lamps, Plumbers' Torches, &c.

Double-Distilled Deodorized Benzine and Naphtha of all grades and gravities from 62° to 76°, for manufacturing varnishes and mixed paints, rubber and gossamer goods, floor and table oil cloths, as well as for general use of druggists, dyers, cleaners, etc., etc.

The above goods can be had in quantities to suit the purchaser everywhere in the East, either through our agents, or from us direct.

Pratt Manufacturing Co.

Proprietors "Pratt's Astral Oil," 26 BROADWAY, NEW YORK.

INDUSTRIAL SECURITIES.

Industrials.

The fair business noted the past few weeks continues. Trade is not really active and orders are generally for smal lots, but they are often sent, a pretty certain indication that stocks in hands of dealers are small. At the same time it is very difficult to find speculative buyers even when statistics would seem to warrant a rise, nor is it more easy to induce a dealer or consumer to buy beyond immediate wants. The tendency of prices generally is downward, and the enthusiasm exhibited just before and immediately after the passage of the tariff bill has somewhat subsided. The great products of the farms of the country are heavy, without any immediate signs of recovery, and this seems to many to be a bar to any great general prosperity. Cotton, wheat and corn are all lower. The labor situation has not been so conspicuously before the public of late, but many of the mill hands in the Eastern States are still "resting" and a few unimportant strikes have taken place. The financial outlook from the banker's view is better and he prophesies higher money and a better condition of the National Treasury, but with low prices for the crops being gathered, and less than normal business or speculation, it is difficult to see how money can rule much higher under natural circumstances. For a considerable time, no doubt, the Government will continue to increase its cash balance through customs receipts. Foreign exchange is firm, and those who a week or more ago talked of immediate gold imports are not so confident, and yet we are nearing the time for the inflowing of gold. In Wall street, where, for a month or more, the bull pools have carried on an unusually active manipulation, there are signs of weariness and a desire to get rid of some of the load. The pool managers have shown a nerve and perseverance worthy of success, but the shorn lambs have become sheep, and time only will bring a new flock, while investors will endeavor to be more discriminating than ever.

Sugar stock has been active as in the past, but the fluctuations have not been great for this erratic security. The regular dividend was declared at the directors' meeting on Tuesday, but, it is reported, against the wishes and vote of the president and other members of the Board.

The fluctuations during the week have been from 103⅝ to 106⅝ the lowest Wednesday and the highest Thursday, closing to-day at 105¼ bid.

Whiskey stock has been very actively dealt in, sold at the lowest price of the year and very near the lowest panic prices. Wall street, as well as the company's own customers, utterly lack confidence in the management, which is believed to be composed of men willing to wreck the company for their own speculative or other profits. Of course, many ask why this great break in prices of the stock, and who is responsible for it. The names of the manipulators may never become public, but it is the general opinion that Morris and his associates are the principals. The stock may be selling for more than its worth to-day, but few if any outside of the company's offices know much about its condition.

The fluctuations for the week have been from 12¾ to 16¼ the lowest on Thursday and the highest on Wednesday, closing to-day at 13¾ bid.

Lead stock has been very quiet this week. It sold ex-dividend on Monday and recovered the same in price, though for several days there was hardly a trade made, but toward the close of the week there was an attempt to sell long stock, and traders sold it down to 41½ on Friday, the lowest it has been for a considerable time and to-day at 41¼.

The fluctuations during the week have been from 41¼ to 43½ the lowest on Saturday and the highest on Tuesday, closing to-day at 41⅛ bid.

Cotton oil stock has not been actively traded in, and while it has fallen off somewhat in price, as a whole it has been strong, the company marketing the balance of its products of the last season's make at better prices than seemed possible a few weeks ago.

The fluctuations during the week have

In the following table are given the closing quotations last Friday night, and also the price realized at the last sale, though the market review is complete to Saturday noon:

The works of the American Rubber Company, of Boston, have been closed since Sept. 8, and the two factories of the Woonsocket Rubber Company, in Rhode Island will close Sept. 22. The other factories will close gradually, as fast as present orders are completed. It is understood that the duration of the shut-down will be four weeks.

St. Louis Oil Market.

(Special to the Reporter.)

LINSEED OIL.—The market has a stronger feeling than at time of previous report, and while sales are now based upon 48c for car lots, an early advance is expected. The demand has been very much improved, owing to a number of large buyers anticipating their wants under the belief that higher prices will soon prevail.

FLAXSEED.—Arrivals are distressingly small and spot seed is scarce. The market, in consequence, maintains a firm position, and shows an advancing disposition; $1.22 to $1.23 is bid for supplies, but no sellers in sight.

CASTOR OIL.—There is a good demand, and the prices recently established of 11c for best and 8¾c for No. 3 are readily obtained.

LARD OIL.—The market has advanced to the tune of about 5 to 6c, and extra is now worth 55c to 56c. The demand is only fair and hardly in keeping with the change in the market.

NEATSFOOT OIL.—There has been a sharp advance in this oil. The distribution is very much larger, and all sales are based upon 55c for extra and 45c for No. 1.

STANDARD OIL COMPANY

DEALERS IN

SPIRITS TURPENTINE, LINSEED & COTTONSEED OILS

Food and Drug Adulteration.

The question of adulteration of food and drugs in this country is discussed in detail in the report of Special Agent Alexander J. Wedderburn, of the Agricultural Department. After referring to the fact that the public ideas of adulteration of food are in many cases very much exaggerated, the report says:

It has been proved that adulteration is general and increasing, and that no kind of food, drugs or liquors is free from the finishing touches of the manipulators. Whether the intent be criminal and vicious or simply fraudulent, the result is the same, and the people will continue to suffer until the strong hand of Federal law steps in to supplement and support the action of the States.

The extent of adulteration is fully 15 per cent., of which 2 per cent. is of a character injurious to health. But to furnish 65,000,000 people with food, drink and drugs costs not less than $6,760,000,000, and it is found that the amount of adulteration reaches the immense sum of $1,014,000,000 annually. As at least 2 per cent. of the whole is deleterious to health, $135,200,000 constitutes the annual amount paid by the American people for sacrifice of their lives or injury of their health. As there exists no more serious or exhaustive drain upon the resources of the people than the adulteration of their food and drug products, the Federal Government should enact a law to prevent the transportation of misbranded, poisonous or deleterious food and drug products from one State or Territory into another, not interfering with the police powers of the State. This being done, the various State laws would become effective, and by systematic effort on the part of officials or honest dealers and manufacturers adulterations would be reduced to a minimum and millions of dollars saved annually to the country. The cost of execution of such a law would be moderate, and should be borne by the manufacturers of food and drug products.

The Bengal Shellac Industry.

The French Consul at Calcutta, in a report upon the present condition of the Indian lac industry, states that the finest descriptions of sticklac are found in Assam and Bengal, that coming from the former country being a very important article of trade. Lac from Burmah, which is chiefly produced in the upper districts and the Shuan States, is sent to Calcutta to be worked up. Burmah, it is stated, is in a position to supply endless quantities of lac, as the vast forests there contain many descriptions of trees adapted to its development. The districts of the Punjab and Mysore are large producers of lac, which is chiefly used at the places of production, its inferior quality rendering it unfit for exportation. Then come Bengal, Oudh, Scinde and the Central Provinces. According to quality, it is either sent to Calcutta to be melted or to certain towns of the interior, such as Hyderabad and Mirzapore, for working up into bangles and other articles. There are large numbers of lac factories in India, but most of them are of little importance, and only turn out products of very second rate quality. The methods of manufacture vary according to district. In hat-making a mixture of lac, mastic pounce and other resins, dissolved in alcohol, is used to stiffen silk hats, and in lithography lac is used in connection with the preparation of the ink. Mixed with resin and certain coloring material it makes sealing-wax. Lac also enters into the composition of numerous varnishes. In adding to a solution of lac in alcohol a yellow clear substance, such as gum gutta, saffron, etc., a liquid is obtained which gives to copper and other metals the appearance of gold, while still preserving their brightness. The quantity of lac exported in 1892-93 amounted to 125,246 cuts, valued at 7,787,583 rupees. In the preceding year the value amounted to 7,444,460 rupees.

DRUG MARKET.

Note—*Our prices are for large lots except when otherwise specified, and buyers of small quantities must expect to pay an advance on these figures*

SATURDAY EVENING September 15, 1894.

There is a good steady demand from consumers in progress, but little or no general speculation, the absence of this feature being looked upon with favor by dealers. Chinese goods continue to advance steadily, and even higher prices are looked for.

Advanced.	Declined.
Quinine.	Opium.
Fir balsam.	Morphine.
Coriander seed.	Arnicas.
Oil, anise.	Canary seed.
Oil, cassia.	Caraway seed.
Oil, cloves.	Oil, peppermint.

Cloves.	
White pepper.	
Pimento.	

Opium.

The market has been somewhat unsettled, and the tendency has been towards a lower basis. Early in the week 10 cases sold at $1.90, and later 2 to 5 case lots sold at $1.87½ and $1.85. On Friday jobbers appeared, thinking $1.85 a low price, and purchases of 75 cases were made at this, but after the sales were consummated, Smyrna cabled 7s 5d asked, and requesting offers. This had a depressing effect, and offers of lots were made at $1.82½, with no takers. The general quotation for single cases at the close is $1.90@$1.92½, but this might be shaded on an offer. Jobbing sales have been made to-day at $1.95, and powdered has sold at $2.60. A rumor has been circulating in the market for several days that anywhere from 50 to 100 cases have been sold to the Dutch Government to be shipped in October, but nothing confirmatory can be had, and, pending further particulars, the trade is disposed to question the story.

Opium, natural (cases)	℔ lb.	1 90 @1 92½
as wanted		1 95 @ —
powdered		2 60 @ —

Morphine.

In sympathy with the downward trend of opium, morphine in large bulk has sold at $1.55. Possibly $1.52½ will buy.

Quinine.

The market closes firmer, owing to a good demand, and manufacturers report the placing of contracts for large bulk and small packages. Early in the week the market was quite easy, and 20,000 ozs, in two lots, sold at 23½c spot cash; later, 10,000 ozs sold at 23¾c spot cash. Sales were also made at 24c. The aggregate for the week is about 75,000 ozs. At the close, 24c has been bid and refused for lots, but 24¼c cash might buy in a moderate way. Up to 24¾ is named.

Miscellaneous.

ACID CITRIC.—Since the decline noted in our last nothing has transpired.

ALCOHOL.—There has been no change in quotations, but, in view of the dullness prevailing, we understand that the Trust is quoting 2c lower, say $2.37 net. Independent alcohol can be bought at this and possibly a shade less. These prices are for car-loads. An extra 2c is asked for 10 bbl. lots.

ALCOHOL WOOD—The manufacturers have been in session here for two days, but no changes in prices have yet been announced, if any are contemplated.

AMMONIA CARB.—A decline of ¼c has been announced.

BEESWAX.—No new features are recorded, and prices remain as before.

BORAX.—Demand continues good, but nothing new has transpired, and prices remain unchanged.

BRAZIL WAX.—Supplies are not large, but demand has slacked off a trifle. Prices, however, remain firm, though unchanged.

CAFFEINE.—There is a good demand, but holders of the limited stock are unwilling to accept orders, except for small lots. The prices remain unchanged.

CASTOR OIL.—At the quotations there is a fair demand, but no new features have developed.

CASTILE SOAP.—Sales of 900 boxes ex-dock, are reported at 9⅝c. The market is firm.

COCOA BUTTER.—Our range is 32 @32½c, with sales at 32¼c.

COD LIVER OIL.—The market is firm, up to $30 is quoted as to brand. Sales of 25 bbls. have been made at $28, and although this price is generally quoted as bottom, $27 will buy.

COLOCYNTH.—Trieste are very firm, though prices are unchanged. Some dealers, however, ask more money. Spanish are firm in sympathy. We heard of a sale of 3,000lb, but price is withheld. Little or nothing can be had abroad.

CUTTLEFISH.—Competition keeps the market down to 8@8¼c.

DRAGON'S BLOOD.—Reeds are offering at 65c and mass at 18@20c.

ERGOT.—New crop has sold at about the prices now prevailing here for ordinary quality.

GLYCERINE. — Competition still keeps the price down. Crude has advanced abroad, so that the situation remains about as it was before the tariff was lowered.

JAPAN WAX.—Sales of 10 cases have been made at 7c, and 3 cases at 6¾c. The latter will buy quantities, though 7c is exacted for single cases.

LYCOPODIUM.—New crop offered about 44c here, and with only a moder-

E. J. LAVINO & CO.
PHILADELPHIA & SMYRNA

Private Formulae

PILLS

We can manufacture in no smaller quantities than 3000 with a sugar coating, or 1000 gelatine-coated.

FILLED CAPSULES

Either hard or elastic, in quantities of 500 and upwards—5- and 10-minim, and 2 1-2-, 5-, 10- and 15-gramme capacity.

TABLET TRITURATES

We are prepared to furnish of any special formula, provided the quantity is not less than 1000 tablets, and the amount of the medicament does not exceed 3-4 grain in each tablet. This rule, however, is necessarily elastic, and depends considerably upon the nature of the proposed medicament.

LIQUID PREPARATIONS

Such as Fluid Extracts, Elixirs, Wines, Syrups, etc., we can handle in quantities of three gallons and upwards.

COMPRESSED TABLETS

We can prepare for you in as small lots as 1000, and from 1-2 grain to 180 grains in weight.

HYPODERMIC TABLETS

Will be provided in accordance with any formula submitted, in quantities of 1000 and upwards. Due care should be observed that the dose be not too large for the size of the tablet, which, when finished, weighs 1-2 grain.

We should, in a word, be glad to submit quotations upon the manufacture of

ANY LEGITIMATE PHARMACEUTICAL PREPARATION

Your Private Formulæ will leave our laboratory with a guarantee not only as regards the quality of the ingredients, but furthermore, that they were manufactured in strict accord with the formulæ submitted

With formulæ containing quinine you will not find upon analysis that some cheaper alkaloid of cinchona was substituted; or where quinine, 2 grains, was specified, you will not find that only a fractional part of that amount was used. With your pills, for example, it will not be possible for you to sum up the total number of grains according to your formula, and then find upon weighing, with excipient, coating and all, that the weight is not more than should be the weight of the active ingredients alone before being incorporated into the mass. We say this advisedly, for in several instances *where we were underbid* we have had such facts directed to our attention. **Our Prices** are not always the lowest, but with our quotations goes the *guarantee* allude to above, and furthermore, **absolute secrecy in connection with your formulæ.**

COPAIBA.—Demand is good, though featureless. Central American is that mostly inquired for.

CANADA FIR.—A sharp advance to $3.00 has taken place, as it has developed that the spot supply is light and firmly concentrated. Nothing has been obtained from the interior since our last, and none offers. Sales have been made at $2.75, but nothing can be had at this. Conditions are such that higher prices are among the probabilities.

PERU.—Is easy, at our quotations.

Essential Oils.

ANISE.—There has been a good consumptive demand, and some dealers have found it necessary to replenish stocks. About 20 cases have changed hands at $1.75, and the price is now $2.00, as strictly bottom, at which single cases have been sold. Some dealers, however, quote up to $2.10 and even higher. The stock is exceedingly light. December shipment is offering at lower prices.

CASSIA.—There has been some inquiry, and 30 cases changed hands at 85c. The stock is light, and 92½@95c is quoted, though most dealers quote the outside price.

CITRONELLA.—One of the favorite brands is out of the market.

CLOVES.—A sharp advance in the price of cloves has caused makers to advance the oil to 55@57½c, and higher prices are looked for.

PEPPERMINT.—There is some manipulation at work in the market, and lower prices are recorded on the spot, in view of the state of the markets at the source of supply. In case oil 25 cases have been sold at $2.25, though

Gums.

ALOES.—Beyond a good jobbing demand, there is not a new feature.

ARABICS.—Cairo advices state that the market has been cleared of all the spot stock. Prices are firm, though unchanged.

BENZOIN.—We get a sale of 5 cases at 30c.

CAMPHOR.—The market continues very firm, though unchanged. Demand is not brisk.

CHICLE.—Large lots have been offered at 27½c, without finding takers. Jobbing price is 28@30c, at which sales have been made.

KINO.—Remains scarce and is quoted at $1.50.

SENEGAL.—The crop is reported as only 4,000 bags, as against 8,000 last year.

TRAGACANTHS.—Remain firm and unchanged.

GINSENG.—Offerings are good, and full prices are being paid for them.

GOLDEN SEAL.—There has been some inquiry for export, and 1,200 lbs. were sold at 19½c.

IPECAC.—The range is 90c.@$1.00, as to quality, with a good demand in progress.

JALAP.—The market remains firm, with stock in first hands limited.

LICORICE.—We get a sale of 10 cs. selected, in bundles, at 8c.

MANACA.—A small lot is offering at 55c.

ORRIS.—Reports from Leghorn state that the new crop is arriving, is abundant, and of good quality.

RHUBARB.—Cables state that the season is about over, and that orders from here remain unfilled. There is a good demand, and prices continue firm.

SARSAPARILLA.—Arrivals have been heavy, but views of first hands are above those of dealers. Jobbing at 7¾c.

SENEGA.—For export 2,000 lbs. sold at 32c. It is reported that stock in Manitoba is getting low.

Seeds.

ANISE.—Sifted Italian can be had at 8c.

CANARY.—Lack of demand has caused an easier feeling, and prices are a shade lower. A sale of 100 bags of Sicily was made ex dock at 3½c, and 125 bags Smyrna sold at 3¼c.

CARAWAY.—Free arrivals have slightly eased the market, and 6@6¼c is now quoted.

CELERY.—The price is still 11c. The crop is estimated at 2,500@3,000 bags, and spite of the reported manipulation abroad, this market has not been affected.

CORIANDER.—Has advanced to 9c, the lots expected not having arrived. The spot stock is limited. October delivery offers at 7½c, and November at 7c. There seems to be a feeling that this article is being manipulated abroad. The claim is made that troubles in Morocco have prevented the shipment of supplies.

FENNEL.—We get a sale of 1,000 lbs. German at 8½c.

HEMP.—Is firm, though unchanged.

MUSTARD.—Estimates place the crop of yellow at 25,000 to 30,000 bags, and brown at 10,000 bags. The situation does not appear to warrant extreme prices, and in consequence there has been a fractional decline. Last year, with a large crop, a shortage abroad admitted of the export to Germany of large quantities, but the crop of German yellow is so large this year that offers are being made to arrive at 3¼c. On spot considerable of last year's stock has been picked up at 3⅝@3¾c, the sales aggregating about 500 bags. A poor quality can be had at 3½c, but 1,600 bags new, just received, is offering at this, and to arrive 3⅜c will buy. In San Francisco about 2,000 bags have been sold at the parity of 3c f. o. b., equal to 3⅜c here. German brown offers at 2½c and Bombay at 2⅝c.

RAPE.—German offers at 2⅝@2½c and English at 3¼@3⅜c.

Shellac.

Demand continues good, but beyond a fractional advance in D. C., nothing of special interest has transpired. D. C. is in demand, and closely concentrated, 38@40c being the quotation at the close. The inside is for 50 case lots, and the outside for smaller quantities, V. S. O., is scarce. The same is true of A. C. Garnet. The cost to lay down is over 24c. A London letter says good T. N. is very scarce at the moment.

Spices.

A good jobbing demand is still in progress, as dealers' stocks have been running very low. In Canton cassia all cheap lots have been closed out, and the best prices for invoices is now 7 1-8c, either spot or to arrive. Saigon is firm on spot. To arrive, 200 cases sold. Cloves have been very active, the sales since our last aggregating fully 2,500 bales, at from 5½ to 7c, this latter price being paid to-day. A cable was received stating that a French house had been unable to secure goods to fill its contracts, and had been obliged to go into the market to buy, the result being an advance in Zanzibar to 8c. The stock is large in Europe, but under excellent control, and reports as to the crop are not at all favorable. Higher prices are looked for. We get 25 tons black pepper at 5 3-8c net cash. Pimento has sold at 6c in invoices.

Important Move Against the Whiskey Trust.

At a recent meeting of gentlemen holding and representing, it is stated, a large proportion of the outstanding rebate vouchers of the Distilling and Cattle Feeding Company, held in this city a few days ago, the following resolutions were adopted:

Whereas, From the report of the company, dated April 1st, 1894, it appears that there are outstanding about $1,800,000 rebate vouchers; and

Whereas, $2,500,000 bonds of the Distilling and Cattle Feeding Company are deposited with the Central Trust Company of New York to secure the payment thereof; and

Whereas, In said report the company states that an additional $1,000,000 of bonds of the same issue were, during the course of the year, sold to friends of the company at 50 cents on the dollar, which the company regards as a good price, it having been found impossible to sell the bonds otherwise; and

Whereas, It appears from this that the security deposited with said Central Trust Company is totally insufficient and inadequate to secure the amount of the vouchers outstanding; and

Whereas, doubts have been freely and frequently expressed in public as to the ability of said Distilling and Cattle Feeding Company to pay said vouchers; and

Whereas, The great the decline in the value of the company's stock has lent credence to such reports; and

Whereas, The holders of the rebate vouchers are the chief creditors of the company.

Resolved, That a committee of three, viz., Messrs. Martin R. Cook, Henry E. G. Luyties and S. M. Rice, with power to add to their number, be hereby elected for the purpose of taking all steps for the protection of the interests of holders of the rebate vouchers here represented, and all who may, under appropriate conditions, join herein, with special power to said committee to secure an examination of the affairs of said Distilling and Cattle Feeding Company, and generally to take such steps as it may deem necessary and judicious for the protection of the interests of the holders of the rebate vouchers, and the collection of the moneys represented thereby.

An agreement prepard by counsel was submitted and approved under which any holder can participate.

Holders are requested to send their names and addresses and the amount of certificates held by them to any of the committee or to the secretary, Mr. James Kirkpatrick, 146 Franklin street, New York. Such action will in no way involve the holders in any obligation, but will be used merely to enable the committee to send them further information in regard to the movement for their protection.

The N. W. D. A. and Free Alcohol.

The "Reporter" sought an interview with Mr. Albert Plaut, of Lehn & Fink, as to the work performed in Washington by the special committee of the N. W. D. A., which was appointed by Mr. George A. Kelly, of Pittsburg, Chairman of the Committee on Legislation, to place before the Secretary of the Treasury the views of the N. W. D. A. on the free alcohol question. Mr. Plaut was a member of the committee, which consisted of eleven members, three wholesale druggists, three manufacturing pharmacists, and five makers of proprietary medicines. The committee was assisted by ex-Gov. George S. Boutwell, of Massachusetts, who was Secretary of the Treasury during the administration of General Grant, and was the first Commissioner of Internal Revenue. He gave the members the benefit of his advice and experience.

"The first meeting of the committee," said Mr. Plaut, "was held at the Arlington Hotel, last Wednesday, at 11 o'clock in the morning. A discussion lasting several hours then ensued as to just what we should recommend to the Secretary of the Treasury, as the views of those we represented on this vexed question of regulating the use of alcohol, so as to prevent frauds being perpetrated on the Government. Ex-Governor Boutwell was finally requested to embody the views of the members of the committee as developed by the discussion, in the form of letter, to be submitted to the Secretary of the Treasury, and the meeting adjourned until 4 o'clock in the afternoon. In the mean time, Mr. Kelly made an appointment with Commissioner Miller, to meet him and Secretary Carlisle Thursday morning at 11 o'clock. When the committee reassembled at 4 o'clock, the letter drafted by ex-Gov. Boutwell was submitted, and after the most careful consideration, during the course of a lengthy discussion, it was finally adopted after some change and amendments had been made."

Through the courtesy of Mr. Plaut, we are enabled to publish a copy of the letter, which is as follows:

Washington, D. C., Sept. 13, '94.

To the Honorable, the Secretary of the Treasury, and to the Honorable, the Commissioner of Internal Revenue.

Gentlemen: In conformity with the understanding that we had at the interview with you on the 4th inst., and in behalf of the National Wholesale Druggists' Association, the following views are respectfully submitted in regard to the regulations to be prescribed by the Secretary of the Treasury for the execution of Section 61 of an act entitled "An act to reduce taxation, to provide revenue for the Government, and for other purposes," viz.:

(1) The law appears to have defined the meaning of the word "manufacturer" for all the purposes of the statute. He must be a user of "alcohol in the arts or in any medicinal or other like compound," and in the use of such alcohol he must have so procured it in defined quantities as to be able to exhibit and deliver "up the stamps which show that the tax has been paid thereon." It thus appears that while the word "manufacturer" is defined, there are limitations to the application of the word so defined, and to persons who use alcohol for the purposes prescribed and who procured it in such form that the stamps can be produced as evidence of the right of the claimant to a "rebate or repayment of the tax" which may have been paid thereon. It is understood by us that the total contents of every package for which a claim for rebate can be sustained must have been used in the manner and for the purposes prescribed in the statute.

(2) While it seems to be essential to the due execution of the law that any applicant for a rebate or repayment of the tax should be able to show that such alcohol has been used in the "arts" or in a medicinal or other like compound, it does not seem to be necessary in the preparation of the regulations to attempt by enumeration or by rules to define the practical meaning under the statute of the word "arts" or of the phrase "in any medicinal or other like compound," inasmuch as in the disposition of such an application for rebate the Department can reach a more satisfactory result by dealing with the particular branch of business which may be covered by the word "arts" and may also decide satisfactorily whether a particular preparation is medicinal or a compound which in its nature is like to a medicinal compound.

(3) It appears to be the requirement of the statute that a party using alcohol for the purposes mentioned must satisfy the Collector of Internal Revenue for the district wherein he resides or carries on business that he had complied with the regulations in order that the party may be entitled

to receive the rebate or repayment of the tax which may have been paid, and it is assumed that the regulations will specify the nature of the evidence to be furnished to the Collector.

(4) It is also assumed that parties who may apply for the benefits or privileges of the statute will be required to furnish bonds for the fulfillment of all their duties, and for an exact compliance with the law and with the regulations of the Department.

(5) It is assumed further that the execution of any regulations which may be established will be attended with expenses for the payment of which no appropriation has been made. Under this head it is suggested that a graduated tax or fee might be laid upon manufacturers for the purpose of creating a fund in the hands of the Secretary of the Treasury from which any additional expense might be met.

(6) It may not be out of place to say that the parties that we represent are greatly interested in the subject to which this communication relates. At the present moment we are unable to proceed to the manufacture of goods in quantity, not knowing but that we may be compelled to put our products upon the market in competition with articles made from free alcohol. We are therefore anxious for an early announcement of the regulations.

"The letter may not appear," continued Mr. Plaut, "to go far enough, but it is exactly what the Secretary desired from us at the interview we had with him last week. By appointment, we were at the Treasury Department at promptly 11 o'clock Thursday morning, and there were present besides the Secretary and the Commissioner, the members of the committee, a dealer in photographic supplies, and a representative of a manufacturer of a well-known bitters. Mr. Kelly presented the letter with a few explanatory remarks, which the Secretary appeared to receive favorably, he stating that he would give the letter careful consideration. He asked some questions regarding points that occurred to him as being in line with the spirit, though not the letter of the law, and which would be very difficult of enforcement. The representative of photographic materials spoke in favor of bonded factories, and the "bitters" representative tried, in a lengthy argument, to show that his product was a 'medical preparation,' and entitled to all the benefits of the new law.

"The committee was very pleased with the close attention the Secretary gave to all questions that arose during the discussion, and the intimate knowledge he displayed of the details of the question at issue, and both he and Commissioner Miller, while fully impressed with the difficulties in the way, seemed sincere in their desire to put the law into operation at the earliest possible moment, under regulations that will fully protect the Government against fraud. We gathered from remarks which the Secretary made, that he did not favor the bonded factories plan, as it would, in the very nature of things, exclude from the law's benefits thousands of small manufacturers plainly entitled to them. The Secretary appeared unwilling to allow the mere presentation of stamps, with affidavits that the alcohol represented by them had been used in such and such preparations as sufficient evidence to obtain the rebate. He plainly intimated that the Department must know in advance who desired to partake of the benefits of the law, so that a proper control could be established. We inferred that an authorization, or license, would be required, before any one could take advantage of the law, and that necessarily considerable time would elapse before all such could be acted upon."

Mr. Plaut gave it as his personal opinion that there will be no free alcohol, except for such manufacturers as produce products from which it cannot possibly be recovered.

In the evening the committee occupied a box at Primrose & West's Minstrels, and during the performance one of the "end" men quietly remarked: "Mr. Chairman, it is not so much free trade the people want as free whiskey," which sally was highly appreciated by those in the box.

Awards for Marine Hospital Supplies.

The following awards have been made for supplies for the Marine Hospital Service. The price given is the total for amount required, unless otherwise stated.

Bidder 1. McKesson & Robbins.
2. Shoemaker & Busch.
3. Alonzo L. Thomsen.
4. Mallinckrodt Chemical Works.
5. Rosengarten & Sons.
6. Parke, Davis & Co.
7. Lehn & Fink.
8. Sharp & Dohme.
9. Meyer Bros. Drug Co.
10. Morrison, Plummer & Co.

25,000 gm chloroform, purif, 500, $62.95, bidder 2.
3,000 gm do 250, $8.10, do.
500 gm do 100, $1.56, do.
50,000 gm chloroformum venale, 5,000, $56.50, bidder 4.

CHEMICAL MARKET.

Note—*Our prices are for large lots except when otherwise specified, and buyers of small quantities must expect to pay an advance on these figures.*

SATURDAY EVENING, September 15, 1894.

During the past week there have been rumors current that an early settlement of the differences which have existed abroad among the alkali makers would soon be adjusted, and that higher prices would in consequence prevail for future contracts. Whether this happy event will be consummated remains to be seen. As it is, however, agents are less inclined to name prices for 1895 contracts, though a fair inquiry is reported from the glass trade. Caustic soda remains more or less unsettled as regards future contracts. English bicarbonate of soda has been reduced for future shipment. As yet, domestic makers have made no change in their price list, though one may be expected in the near future should any quantity of foreign makes come on the market. Oxalic acid, acetic acid and acetate of lime are all higher, while brimstone and chlorate of potash are both weak and dull under a limited demand. Nitrate of soda has arrived quite freely; the bulk, however, was sold previously for consumption. Blue vitriol is easier, and the same may be said of alum. The other light chemicals show few changes.

Heavy Chemicals.

CARBONATED SODA ASH.—There has been a slight increase in the demand for both spot and for shipments to come forward during the balance of this year. The shipments for the past seven months, as compared with those of last year for the same period, are still behind, but during the past month they show a slight increase. Values remain more or less unsettled, and may be called nominal for high test at .90@.95c for bags and .95@1c for casks, as to make, quantity and date of shipment.

ALKALI.—There are reports curren around the trade that there are good prospects of an early settlement of the difficulties which have of late prevailed among the leading makers abroad. In view of this holders have been less inclined to offer future contracts for next fire at previous low figures. While a few sales of high test have been made in bags at a shade under ⅞c, the general quotation at the close ranged from .90@92½c for bags and .95@1c for casks for future contracts, while for jobbing parcels on the spot a shade higher price is named.

BICARBONATE, ENGLISH.—The price for store parcels has been reduced and these are now quoted at 2½@2¾c as to make and quantity. For future shipments of B. M. & Co.'s make they are quoting 2⅛@2¼c as to quantity and date of shipment, at which considerable business is reported.

CRYSTAL CARBONATE.—There is a increased demand for this article, both for prompt and for forward delivery. Values remain steady at 1¾@1⅞c as to quantity and position of goods.

CAUSTIC SODA.—The sharp competition between the domestic and foreign makers for contracts extending over 1895 continues, and at the moment it is almost impossible to give figures at which contracts have been made. The demand, however, is not brisk, as buyers are withholding their bids or making such low ones as to preclude business for the moment. The market may be quoted nominal for 70 and 74 per cent. at 2⅛@2¼c as to test and quantity, and future contracts at about 1⅞c, at which it is reported a fair business has been done. Powdered 98 per cent., while not active, is meeting with an increased jobbing demand at 4¾@4⅞c as to make and quantity. For a round lot it is intimated that the inside figure might be shaded.

SAL SODA.—There is an improved demand for domestic which is being satisfied at .72½@¾c f o b, less the usual discount. Foreign at the moment is rather dull, as buyers are holding off in hopes that lower prices will be named later on. For goods on way they are asking 70c, with 65c bid and declined for 50 tons.

SALT CAKE.—Early in the week, when it was understood that the strike had been settled and that the glass fires would soon be lighted, there was rather more inquiry for spot goods, but later when it was found that the wage question was still in abeyance, with no immediate prospect of an early settlement the demand slacked off. Values, however, remain steady at .45@½c delivered for domestic, .42½c f o b Baltimore, and ½c f o b here for foreign.

BLEACHING POWDER. — While trade is quiet, the stock of prime hardwood goods is very limited for prompt delivery, for which full prices are obtained. For shipments on way there is more demand, with several sales reported at 1⅝@1¾c, as to make and quantity. September shipments of hard wood are held firmer at 1⅝@1¾c, as to port of delivery, at which we note several sales.

Acids.

ACETIC.—The market is very firm with only limited offerings at 1⅝@2c, as to make, quantity and place of delivery. Sales are reported of 300 bbls. at 1¾c.

OXALIC.—The firmness noted in this article continues, and at the close 7¼@7½c was generally quoted, though a few single casks of German might be obtained from second hands at 7c.

TARTARIC.—Under limited offerings the market is firmer in all positions. We quote crystals at 22½c and powdered 23½c, less the usual discount.

MURIATIC.—There is a better jobbing demand reported, which has a tendency to reduce stocks in makers' hands. We quote 18% at .70@.80c, and 20% at .85@1⅛c, as to make and quantity.

SULPHURIC.—During the past week there was a decided improvement in the demand for prompt delivery upon regular contracts. There is very little new business reported, as it is rather early for placing 1895 contracts. For 66% in a larger way they are quoting ¾@.80c, as to quantity, but for jobbing parcels the price ranges from .85@1⅛c, as to size of the order. Chamber 50% is dull, as it is rather early for the fertilizer trade, which does not set in until later in the season. Mean-

Miscellaneous Chemicals.

ACETATE OF LIME.—Pending the action of the makers in regard to a reduction in the price of wood alcohol prices are only nominal at 1¼@1½c for brown and 2@2¼c for gray, as to quantity and place of delivery.

ARSENIC.—The market is very firm for spot goods at 3⅝@3¾c for English and 3½@3⅝c for German, as to quantity, with a good jobbing demand reported from the glass trade. Parcels to arrive are held at 3⅝@3½c, as to make and quantity.

BLUE VITRIOL.—The market is gradually working to a lower basis under a light demand, and more disposition is shown on the part of domestic makers to meet the situation by quoting lower prices, which now range from 3¼@3½c, as to size of the order. There have been several large orders turned down for export at 3c.

BRIMSTONE.—This is about the dullest article on the list. For future shipments of best seconds they are quoting $15.25@15.50, as to quantity and date of shipment, with no transactions to report.

CHLORATE OF SODA.—Rather more inquiry is reported both for spot and forward delivery, but light stocks restrict business. Valnes are nominal at 17½@18c, as to quantity and position of goods.

CREAM TARTAR.—Manufacturers are only offering in a limited way at 17@17¼c for crystals, and 17½c for powdered, less the usual discount.

COPPERAS.—The demand for car lots is almost nil, consequently prices are only nominal at 47c, while for jobbing store parcels the price ranges from .56@.60c, as to quantity and make.

NITRATE OF SODA.—The recent arrivals will in no way affect the market, for the reason that the bulk had already been sold for consumption. There is only a moderate jobbing demand, which is being satisfied at 2.10 @2.15c as to quantity, with sales reported of 1,500 bags within the range. For early arrival they are quoting 2.05@2.10c, while for late shipments 1.97½@2c is named, as to date of shipment.

SUGAR OF LEAD.—Only a moderate demand is reported for brown, at 5¼@5½c, and white at 9⅞@10¼c, as to make and quantity, less the usual discount.

SAL AMMONIAC.—The usual jobbing demand prevails, which is being satisfied at 7c for white, 6¼c for gray and 9¼c for lump.

Vitriol, blue	3⅛@	3½

Ammoniates, Potashes, Etc.

The market for the leading ammoniates is quiet but firm, as buyers are withholding their offers for the present in hope that prices may give way. There has been a slight increase in the orders from the South for blood, but the high price demanded has restricted business for the moment. A few small sales of high grade are reported at $2.60@2.65 and of low at $2.40@2.45, as to quantity and date of delivery. Sulphate of ammonia remains very firm at $3.75 for gas and $3.60 for bone, with only limited offerings thereat. Azotine is held steady at $2.60. Fish scrap has sold quite freely on the basis of $2.20@ 2.25 per unit, f. o. b. factory, which method seems to be growing in favor with both buyer and seller. Sulphate of potash and double manure salt are both in request. We quote for 50 tons and upward the price ranges from 2.08@2.29, as to port of delivery, while for smaller quantities it ranges from 2.24@2.70c, as to quantity. Double manure salt from 1.20@1.46c, as to port of delivery, and for jobbing parcels 1.23@1.52c, as to quantity.

CHLORATE OF POTASH.—Under reports of a weak and dull foreign market, prices here have given way, and at the close it was hard to say what would be accepted for a round lot. Early in the week some speculative lots were closed out at 10½c cash. Since then the market has recovered somewhat, and may be quoted at 11@11½c, as to make, quantity and holder.

MURIATE OF POTASH.—The arrivals at all ports are ample to meet current requirements, which are light. For store parcels they are quoting 1.90 @2c, as to quantity, but for future contracts we quote for 50 tons and upwards, invoice weights as established by the syndicate's agents, at 1.92@ 1.97c, as to port of delivery, but for small quantities 2.03@2.38c, as to quantity.

Philadelphia Chemical Market.

(Special to the Reporter.)

CARBONATED SODA ASH.—Liverpool 48% is meeting with a better demand, especially for forward deliveries. Prices, however, have undergone little or no change since our last report. 58% is quoted at 1@1.05c to arrive and for shipments in casks, and at .95@1c in bags.

ALKALI.—48% is showing some improvement, and the recent arrivals have all been disposed of from dock. For contracts some inquiry is noted, and holders are naming .95@1c, as to style of packages and quantity. 58% can be had on spot at 1.05@1.10c. To arrive at .95@1.02½c. Shipments are held at .92½@.97½c.

SAL SODA.—Is in better demand, with the foreign article quoted at .72½ @¾c for shipments. Spot goods can be had at .80@.90c, as to quantity.

CAUSTIC SODA.—60% on spot is quoted at 2.40@2½c, and to arrive at 2.20@2.30c. These figures are also named for shipments. 70% on spot is held at 2.30@2.40c, and to arrive at 2.15@2¼c.

BLEACHING POWDER.—Is dull, and on spot quoted at 1.85@1.95c, as to brand. To arrive, 1¾@1.85c is named, and shipments are held at 1⅝ @1¾c, as to quantity.

NITRATE OF SODA.—On spot is quoted at 2.15@2¼c, and for shipment 2.02½@2.07½ will buy.

English Petroleum Markets.

London.—This market has remained in much the same apathetic condition as before noticed, no considerations of the general gloominess of the weather, instead of the brightness which characterized the August of 1893, being likely to create a better demand for illuminating purposes now as the daylight gets shortened, appearing to have any effect on the course of trade, which has, with few exceptions, been dull and dragging, and only a limited business has been transacted for either instant or forward delivery. Prices consequently have had little or nothing to disturb them, and where some changes have occasionally occurred they have been marked by the merest fractions either one way or the other. American Refined for delivery up to the end of the year has been taken at 3 3-4d to 4d per gal., and Russian Oil at 3⅝d to 3⅝d, being very similar rates to those of a month back. Water White Oil has been inquired for at 4¾d to 5¾d, and Petroleum Spirit at 6½d to 7¼d per gal. for common and rectified.

Importations of Petroleum Oil, etc. (in barrels), into London and the outports during the past eight months:—

PETROLEUM OIL.

	American.	Russian.	Total.
London	747,283	283,047	1,030,330

Clyde & Leith	1,800	400
Dublin	45,067	41,694
Southampton	17,118	13,694
Manchester	....	....
Totals	1,692,432	1,332,546

The imports of Residuum this year have been 12,928 brls. into Liverpool, against 10,939 brls. in 1893 and 2,124 brls. in 1892.

Liverpool.—The late depression in the market has quite disappeared, and has given place to a healthier feeling. The approach of the season when consumption is expected to expand has also contributed to bring about a better state of things, and business, though moderate, has been of more importance than for some time previously. Imports into the United Kingdom continue to show an increase from America, but from Russia there has been a material falling off. Quotations have remained without alteration, and efforts to raise them have proved futile. Refined Pennsylvanian moves at 4d to 5¼d, according to quality, and Russian refined at 3½d to 3⅝d per gal.—[Oil Trade Review.

DYE MARKET.

Note—*Our prices are for large lots except when otherwise specified, and buyers of small quantities must expect to pay an advance on these figures.*

SATURDAY EVENING September 15, 1894.

There are positive signs of increasing activity. Nearly every branch or department of the market feels the strength and assurance displayed by purchasers in the placing of orders. Stocks are not bought in heavy lots, however, buyers acting in a conservative manner and coming into the market for goods for immediate use and near future stocks. Dyewoods display a slightly stronger position, because of the well regulated supply coming to hand. Cutch and gambier have both been strong for some time, but the market has become somewhat easier within a few days. This inactivity is expected to last for the moment only.

ALBUMEN.—Is in good consuming demand, consumers making their wants known without hesitancy, as the makers and holders are quick to respond at previously quoted prices. Egg is steady at 50@60c, and blood good at 12½@18c, as to grade and quantity.

ALIZARINE.—A fair amount of business is reported. Inquiries for various sized lots are frequent, and there is moderate buying, but principally for jobbing quantities. The quoted price is well sutained at 17@18c.

ANILINES.—Only a routine business is under way. Both oils and salts pass into consumption in jobbing quantities in order to meet the demand of consumers. Oils are quiet but steady at 10¼@11c, and salts 10½@13c, according to grade.

BICHROMATE OF POTASH.—There has been slightly less demand of late, and an easy feeling prevails. Prices are unchanged, being quoted at 9@9¼c, as to size of order. Soda is in fair request at 7@7¼c.

CUTCH.—Is hardly as active as at our last writing, yet about a usual amount of sales are reported for the week. Prices are quoted unchanged and steady at 5½@6c for prime bale and 6¼@7c for slab.

DIVI-DIVI.—Another arrival of 123 bags is reported, but is said to have been bought to arrive. Therefore, the market is unchanged in the light amount of stocks on hand. Actual transactions for spot goods are few, and the wide range of $60@70 is continued by holders.

DEXTRINE.—Is momentarily quiet. Domestic is practically out of the market, and prices are nominal. Foreign is quoted at 5@5½c.

DYEWOODS.—As compared with the trade of a year ago, business is decidedly better; still it is far from being good. There is a slight appearance of an improved demand and better prices beginning to make itself manifest. During the week under review, however, but little actual business was done. The number of cargoes of woods brought into port are generally well regulated with the current demand, which helps materially in keeping the market in a normal condition.

GAMBIER.—The market is momentarily quiet, but prices are steadily adhered to. The week has not witnessed any fresh arrivals and stored goods are firmly held. Prices on quantities to arrive are quoted at 4⅜c. Store stocks are offered at 4⅜@4¾c, as to holder and quantity.

INDIGO.—Is strongly held, and it is thought by some that prices may advance on the supply now in hand before the arrival of the new crop. Reports from England and the Continent are to the effect that trading during the past month has been largely of a retail character and is still continued strictly in accordance with immediate requirements. We quote Bengal as being offered at 95c@$1.50; Kurpahs, 90c@$1.25; Guatemalas, 80c@$1.10, and Manila, 65@75c, as to quantity.

NUTGALLS.—Continue to be asked for in an irregular manner, and previously quoted prices are still in force. Blue alleppos may be had at 13@13½c, and Chinese 10½@11½c. The latter is said to have improved slightly in demand as a result of the war in the Orient.

OXALIC ACID.—Is in good demand and is very strongly held at 7¼@7½c.

PRUSSIATE OF POTASH.—The strong position of previous weeks has been maintained. At the quoted prices there is a good inquiry, and sales are mainly made at the outside price, except for certain quantity lots.

STARCH.—The "bull" movement in corn is becoming a well-fixed condition of the market, and as a result of its strong position starch is very firm. Manufacturers report a good demand in progress. Corn starch is strong at 2⅝@3c; potato is quoted at 3¾@4c, and wheat 4¼@5¼c.

SUMAC.—There is a fair request for spot goods for immediate consumption, but the purchase of large quantities is shunned by buyers. We quote Sicily at $60@62 and Virginia $40@44.

TURMERIC.—A fair jobbing interest is shown and purchases of ordinary quantities form the bulk of transactions. Bengals are quoted at 3@4c.

VACUUM OIL CO., Rochester, N. Y.

Or any Branch.

The AMERICAN Wick

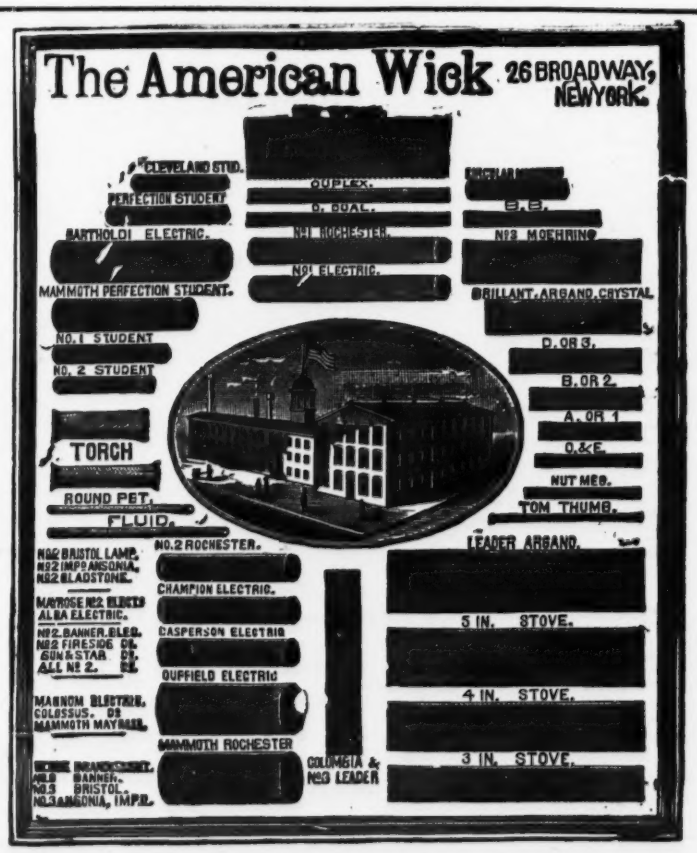
is made on Scientific principles. The gum and dirt inherent in the natural cotton are taken out by chemical processes, involving, besides the expense of the treatment, considerable loss of material; but no loss or expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

Oil drawn up through the American Wick burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with dust and gum as it is in common wicks the full illuminating power of the oil is not obtained and the complaint is heard that the light *drops*.

To ensure the best light, attention must be given to the following points:

THE WICK.

Ask your storekeeper for the **AMERICAN.** If he has it not in stock, tell him to send a postal card to his wholesale dealer, who will supply him. There is no way to get the best light without using *the best wick*.



2. THE LAMP.

Is it dirty? Has it been emptied recently? Every lamp should be emptied completely *once a week*, and always before putting in a new wick.

Is your lamp filled frequently? Lamps should be filled *every day*, so that you may begin the work of the evening with a full fount.

3. THE BURNER.

Is the burner clean? The life of the flame is the air it sucks through the holes in the disk around the wick tube. If the flame is smoky, see whether these holes are clogged or gummed. If so, boil the entire burner for a few moments in sal-soda water.

4. TRIMMING

Does the wick need to be trimmed? If yes, do not scrape it off; this hurts the wick and fills the burner with soot. *Cut it evenly across the top* and *slightly on the corners.*

Trim the wick every day. Put in a new wick *once a month.* The expense of a new wick is trifling. Dry a new wick thoroughly before putting it in the lamp.

By following the above rules and using only the *American Wick*, you will get perfect light, as harmless to the eye as sun-light.

We make wicks for every style of burner in the market. For samples, prices and all information, address

Wick Department Standard Oil Co.
